

Superior Performance

All doors may look the same but they are not built the same

Who We Are...

The no compromise philosophy underpinning the Definitive Collection is driven by our desire to offer you products that have been designed, tested and manufactured with a 'no compromise' attitude.

SCAN ME

Regardless of the style of property you live in, we are sure to have a perfect solution to meet your design aspirations. The Definitive Collection offers you a comprehensive choice of products either from our classically styled sculptured range or from our more contemporary styled chamfered range.

High performance solutions are available to suit any application, whether you are looking for a sympathetic door replacement for your 18th century farmhouse, or a more contemporary look for a modern house or city centre apartment. You can even have your door in any colour you want! Your decision...Your choice...

The Definitive Collection has built a strong reputation over the last 35 years for taking an uncompromising approach to the components we use. Unlike windows, a front door is generally used several times every day and therefore the locks and furniture need to be of the highest quality.

We only fit premium branded products that we are confident will last year after year standing up to the toughest conditions with our changing British climate.

View our entire range of Doors & Windows at www.thedefinitivecollection.co.uk

What We Offer... **SuperiDoor** DOUBLE REBATED | SUPERIOR STRENGTH

One of the most secure composite doors on the market

Secured by Design as standard
(SBD is the official police security initiative)

59% Thicker than the industry standard

Twin rebated as standard

Twice the amount of perimeter weather seal compared to a standard composite door

GRP skin

High impact resistant bonded GRP skin internal & external

Engineered wood surround

For enhanced stability and durability

Security board

Internal security board as standard to meet PAS24

50mm Triple glazed laminated units as standard
108% Thicker
 than the industry norm

There's just something about the sound of a **SuperiDoor** closing.

YOU'LL KNOW WHEN YOU HEAR IT

Yale Lockmaster locking strip

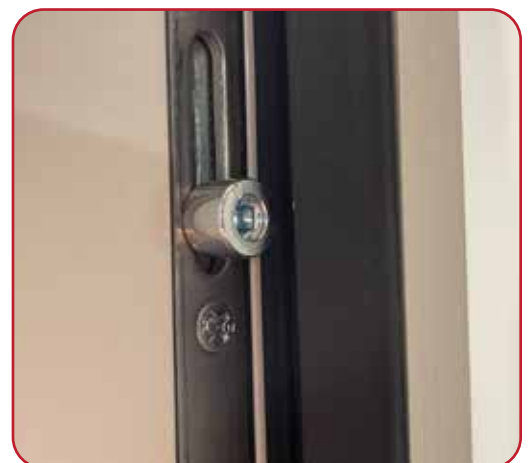

Unlike other composite doors, our door comes with 10 point hook and cam locking for increased compression, security and thermal performance

*Only available on lever/lever handle

Market leading Ultion 3 Star Plus cylinder

as standard, £5000 Security guarantee

Adjustable compression cams

4 x Adjustable compression cams that pull the door leaf into the weatherseal

*Only available on lever/lever handle

Secured by Design

Police Preferred Specification

What is a Secured by Design 70mm Composite Door?

Uncompromising Security and Superior Performance

The PAS24 testing process is one of the most rigorous standards in the industry, designed to push every aspect of a door's strength, durability, and security to the absolute limit. Our SuperiDoor didn't just meet these demanding requirements; it passed with ease, showcasing its unmatched resilience, quality, and design.

"SBD composite doors are designed to reduce the likelihood of burglary by 75% and criminal damage by 25%"

SuperiDoor: Engineered for Security, Designed for Peace of Mind

✓ Door cylinder attacks

The engineer performs a sustained 3 minute attack on the door cylinder using tools like screwdrivers, pliers, crowbars & craft knives

✓ Manual attack with chisels and brick bolsters

The engineer performs a 3-minute manual attack using chisels and brick bolsters to gain entry through the door.

✓ Mechanical load test

All hinge & locking points are individually load tested with a force of 4.5Kn, that is equivalent to 458kg of force!

Rigorous Testing, Superior Results

Scan here to see SuperiDoor in action

The Beaufort Wind Scale is a system used to measure wind strength, ranging from calm conditions to hurricane-force winds. As a homeowner, understanding the wind resistance of the products you choose is essential for safety and durability.

Our SuperiDoor Composite Door has been rigorously tested and has achieved an impressive score of **1200 on the Beaufort scale**. This means that the door can withstand extremely high wind speeds of upto 99mph, providing superior protection against the elements and giving you peace of mind in even the harshest weather conditions. With SuperiDoor, you're not just choosing style and security – you're ensuring the resilience of your home, no matter the forecast.

The information provided is based on a lever/lever door configuration. Please note that the choice of hardware, such as thresholds, letter plates, and other door furniture may impact the door's resilience to adverse weather conditions.

What Sets SuperiDoor Apart?

Lets take a closer look at what makes a **SuperiDoor** Superior!

	Standard Composite	SuperiDoor
Door Thickness	44-48mm	70mm
Glass Thickness	24mm (double glazed)	50mm (triple glazed)
External rebated weather seal	Approx 6 meters	Approx 6 meters
Internal rebated weather seal	No rebate	Approx 6 meters
Locking points	3 to 5	10 point (lever/lever only)

The outer skin...

The outer skin is compression moulded using Glass Reinforced Polyester. This creates a high definition grain effect that cannot be achieved using standard panel technology.

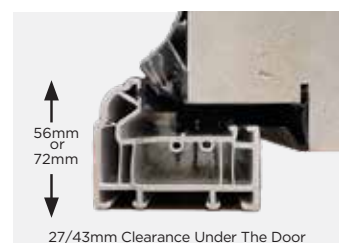

The core...

The core is reinforced and is filled with an insulating core of 100% CFC-free polyurethane. The performance of this product is exceptional, **outperforming solid timber insulation by nine times.**

The perimeter...

The core and timber surround is protected by a perimeter of water resistant polymer instead of timber. Rather than purely relying on treated timber, this product ensures that no water can penetrate to the core. Being a polymer, it has none of the drawbacks of timber.

The thresholds

Two sizes of PVCu threshold.

Our aluminium 44mm rebated threshold carries our best weather performance for an aluminium threshold and is available in either silver or gold

Our lowest profile threshold is available in either silver or gold and is suitable for wheelchair access using the optional ramps that can be fitted both internally and externally.

The Definitive Collection are proud to partner with some of the biggest names in the fenestration industry to delivery you the most versatile and best performing products on the market

One philosophy... Two choices...

As well as choice of style, colour and glass, you can also choose from one of our two frame design options to create that perfect match. The frame designs are also available in a range of coloured and wood-grained foils.

"VEKA is the most specified profile in the world"

The Key to Energy Efficiency: Understanding U-Values

A U-value measures how effectively a material prevents heat from passing through it, making it a crucial indicator of thermal efficiency in construction. Whether for walls, windows, roofs, or floors, a lower U-value means better insulation, helping to keep your home warm in winter and cool in summer. For instance, windows or doors with low U-values are much more effective at reducing heat loss, leading to improved energy efficiency and enhanced comfort in your living space.

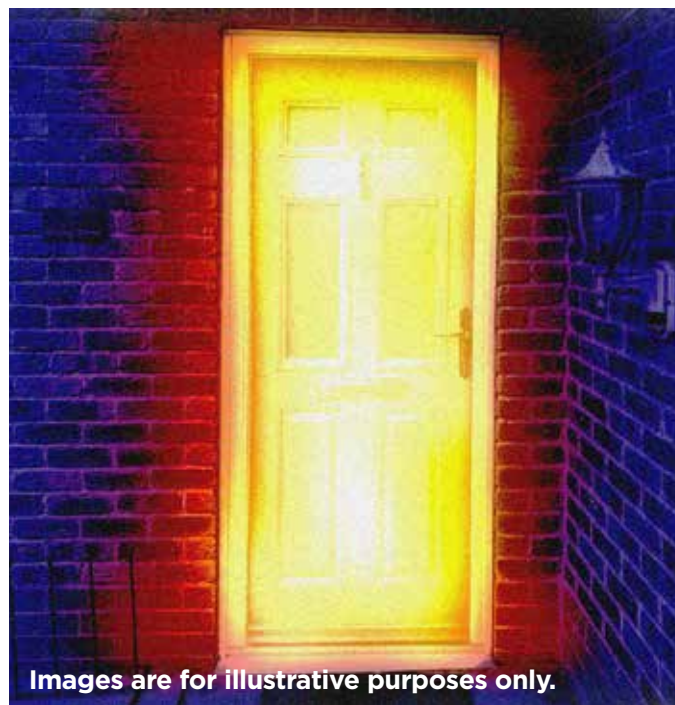

Government Standards and the Need for Better Performance

In 2022, the UK government tightened U-value requirements for replacement doors as part of its commitment to energy conservation and carbon reduction. As of June 2022, the U-value standard for replacement doors was lowered from 1.8 W/m²K to 1.4 W/m²K under the Future Homes Standard. This change reflects the growing need for more energy-efficient homes as the UK moves towards its net-zero goals.

SuperiDoor: Exceeding Expectations

So, how does SuperiDoor compare? SuperiDoor outperforms standard 44mm composite doors by an average of 50% in thermal efficiency. Our doors achieve U-values as low as 0.68 W/m²K* - an impressive **51.4%** reduction in heat-loss compared to the current legal requirements for replacement doors. Even our half-glazed doors maintain superior performance with U-values of 0.8 W/m²K, which is still 50% below the mandated standard which is still a **42.9%** reduction in heat-loss.

Heat Loss Through Doors

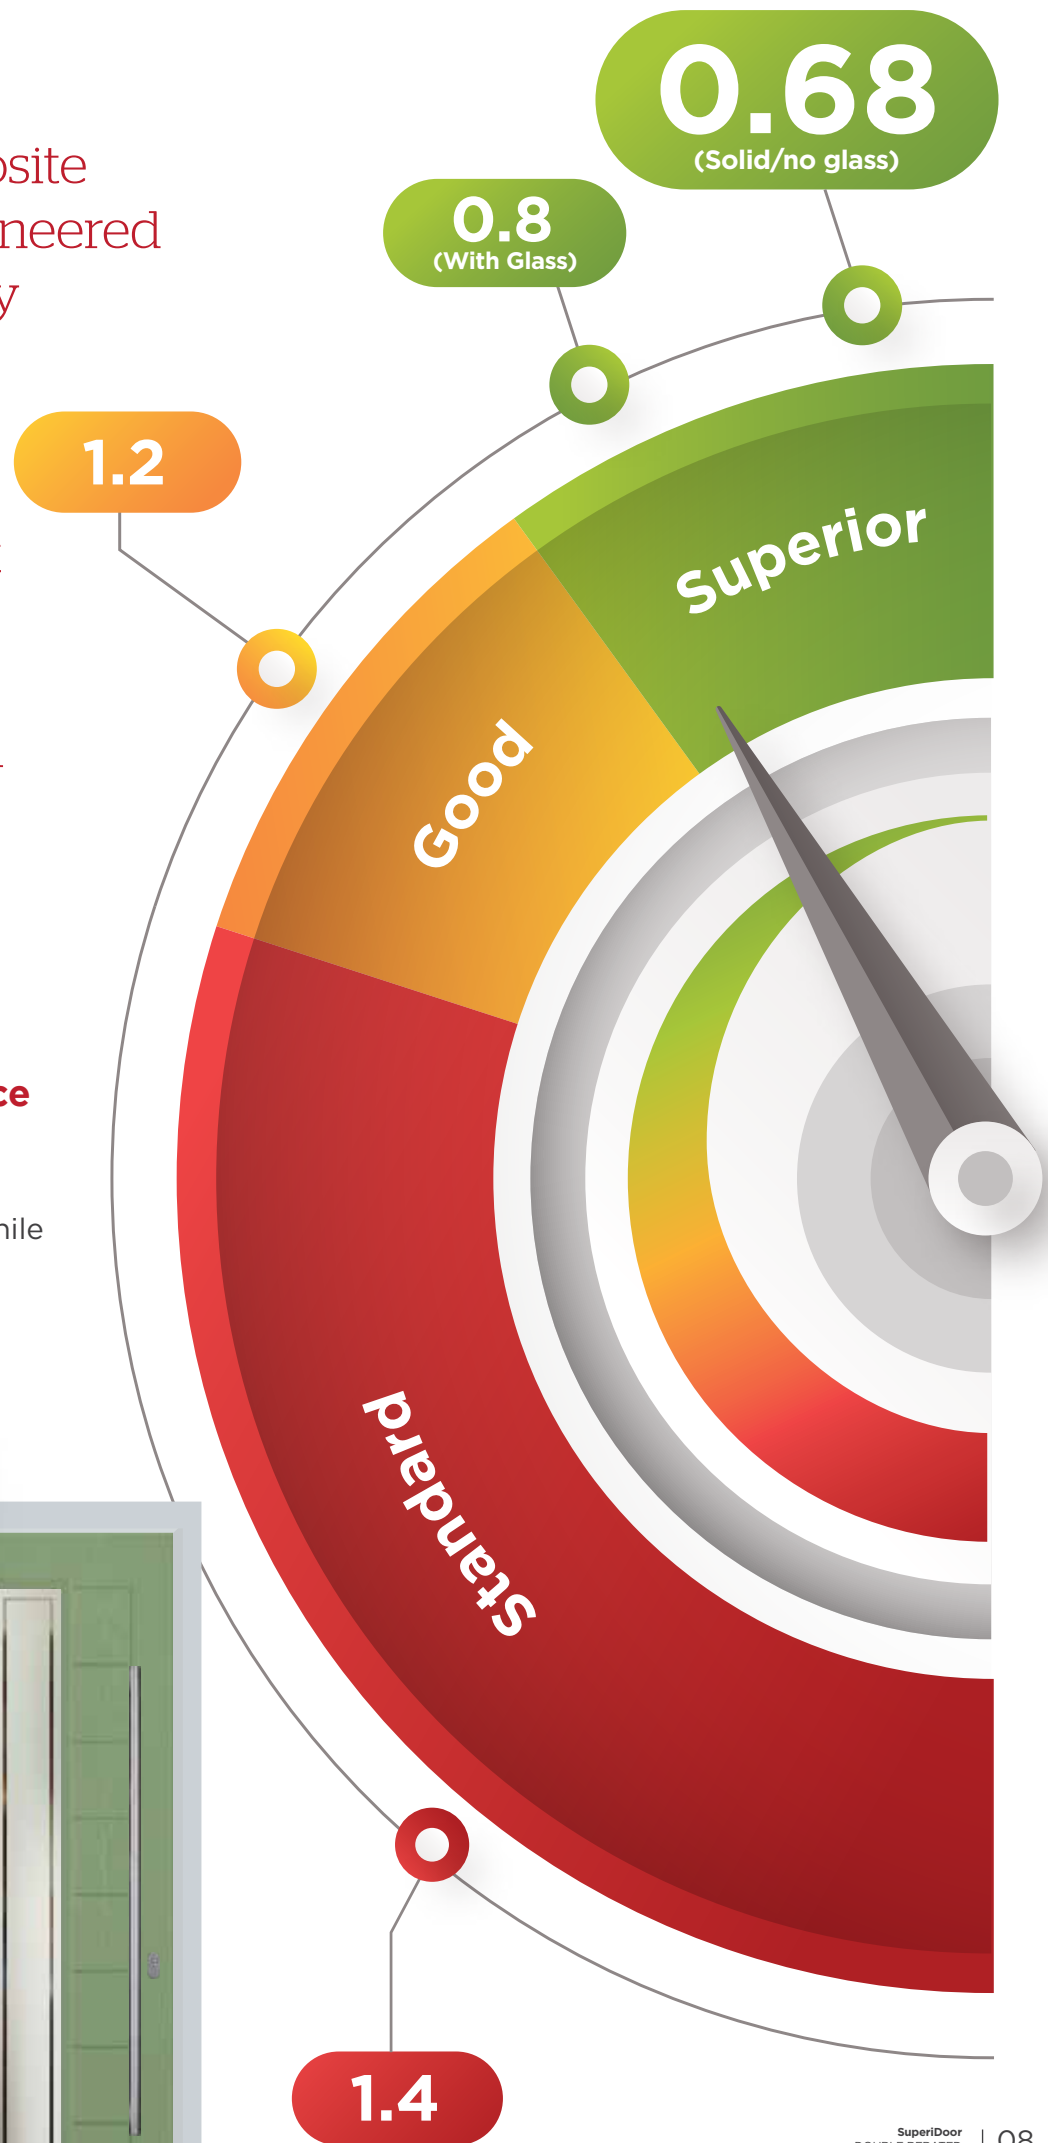

*Please note: The 0.68 U-value can be achieved on a solid composite door with no glass and a low UPVC threshold. Half-glazed doors still perform exceptionally well, achieving a U-value of 0.8 W/m²K, significantly surpassing regulatory requirements.

Did you know?

Our 70mm composite door leafs are engineered for superior energy efficiency. In fact, tests show they are 50% more thermally efficient than solid timber core composite doors (48mm) and timber-paneled doors (44mm).

Welcome to a New Era of Door Performance

Choose SuperiDoor for superior thermal efficiency, reducing your energy bills while enhancing the comfort and sustainability of your home.

SuperiColour, Living Life in Colour...

Colour has the ability to change your mood, spark an idea and trigger a reaction. We categorise things by colour and we all have our favourites. That's why it's important to choose the right colour for your front door; you are setting the mood for the whole house.

Discover deeper, richer tones; classic and delicate neutrals; and shades designed to bring joy. You can choose a colour for both inside and out, and they don't need to match.

To truly let your imagination run wild, you can specify your composite door in any colour you want with our Bespoke painted range. Our door leafs & outer frames are available in over 1 million colour combinations.

Bespoke Painted Colours*

The Definitive Collection Composite Door range can be supplied in any colour for a small premium. All we need is a RAL colour or recognised BS reference and your new door will represent your individuality. A Definitive Collection installer will guide you through the process to help create your perfect door.

All doors are supplied using a Satin finish. The colours of the doors and glass shown in this brochure are for guidance only and may vary owing to the limitations of the photographic reproduction and printing processes.

*Please note, all bespoke painted colours carry a 5 year colour fast guarantee. Bespoke RAL colours displayed are a representation only, we cannot guarantee an exact colour match due to the limitations of the photographic, reproduction and printing processes. It is advised due to print limitations that you view your chosen RAL colour on a RAL swatch with your installer prior to ordering.

10 point locking

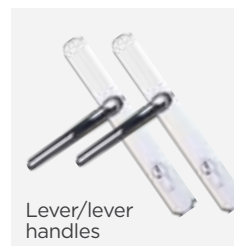

Safe and Secure

As one of the oldest international brands, Yale is among the most respected names in the lock industry, with millions of Yale locks in use worldwide.

You will be comforted to know that our Composite doors with lever/lever handles are fitted with the worlds leading lock brand Yale as standard. Our Yale products are accredited with 'Secured by Design'.

*10 point locking is only available with lever/lever handles.

Lever/lever handles

Did you know...

"Over 70% of all burglaries are accessed through a door, yet there is no minimum security standard in the UK for replacement doors. Rest assured that all SuperiDoors are fitted with Yale or Winkhaus multi-point locks and Ultion 3 star Plus high security euro cylinders as standard."

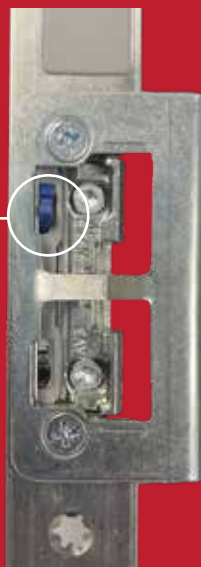

The Winkhaus 'Thunderbolt' key-wind lock is used in conjunction with our stainless steel bar handles or any door supplied without a lever/lever handle. To lock or re-open the door from outside you will need to use the key. Our Winkhaus products are accredited with 'Secured by Design'.

Safety switch latch feature

The safety switch latch comes as standard with 'Thunderbolt' key-wind lock. Giving you peace of mind that you will not be locked out, or safe and secure as soon as your door is closed.

Please note: All doors that require a Winkhaus Lock, (pull escutcheon / bar handle) will have 3 point locking.

NO ACCESS

When the switch is in the up position, a key is required for access

ACCESS ALLOWED

When the switch is in the down position, (as shown) the door can be pushed open

WINKHAUS

Tried, tested and then some...

Secure your home with the new Ultion 3 Star PLUS lock, the only lock proven to defeat all break-in methods and meet the toughest 2024 security standards.

Protects your home against...

- ✓ Picking
- ✓ Thermal Manipulation
- ✓ Bumping
- ✓ Twist Attacks
- ✓ Drilling
- ✓ Snapping

Our composite doors all come with

Cathedral (similar to Minster) | Level 2

Rain (similar to Cotswold) | Level 5

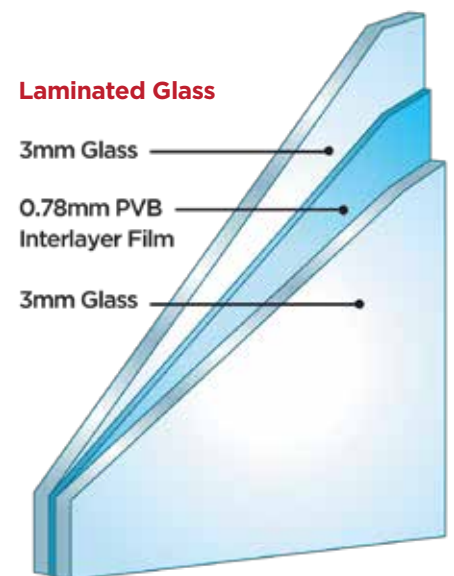

Pinpoint (similar to Stippolyte) | Level 4

SuperiThick as Standard

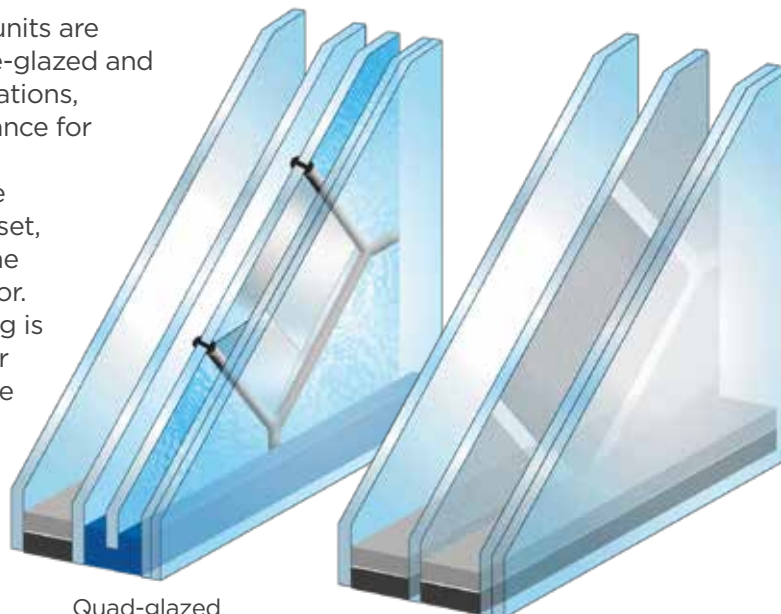

Every SuperiDoor is crafted to exceed expectations in both quality and performance. Unlike standard composite doors with only 24mm glazing, SuperiDoor is equipped with robust 50mm triple-glazed laminated glass units—an impressive 109% thicker than typical options! Laminated glass is made of two glass sheets bonded with a plastic interlayer PVB, offering enhanced resistance to impacts. Unlike toughened glass, it remains intact when broken, providing greater security by making it harder for intruders to gain entry.

This substantial thickness not only enhances thermal efficiency, keeping your home warmer and more energy-efficient, but also significantly boosts security. With Superidoor, superior strength, security, and energy efficiency aren't optional—they come standard, delivering peace of mind and lasting performance with every door.

SuperiDoor anything but standard

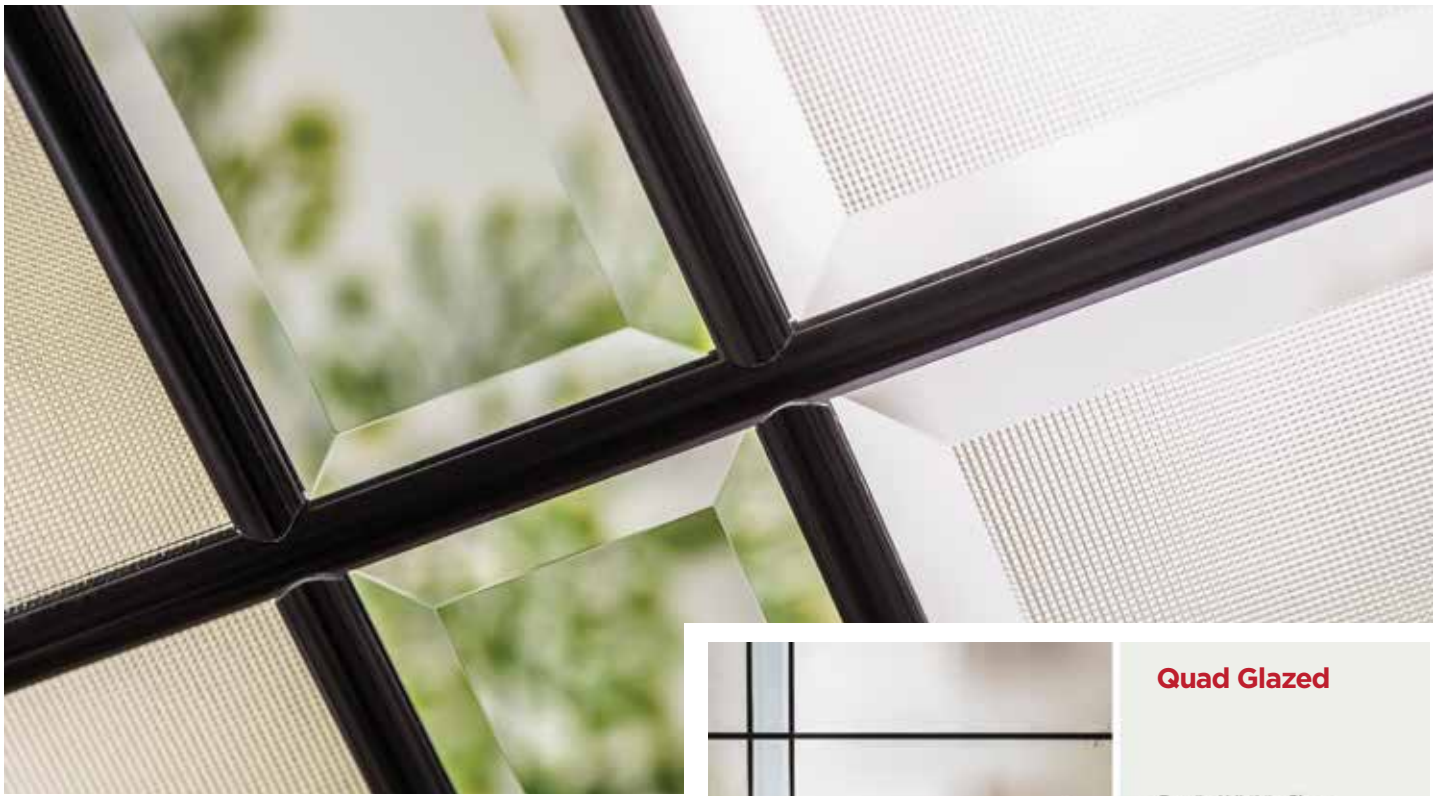

Our decorative glass units are available in both triple-glazed and quad-glazed configurations, offering tailored elegance for your door design. In quad-glazed units, the decorative pane is offset, bringing it closer to the interior side of the door. This unique positioning is a result of the superior 50mm thickness of the quad glazing, enhancing both durability and insulation.

Quad-glazed

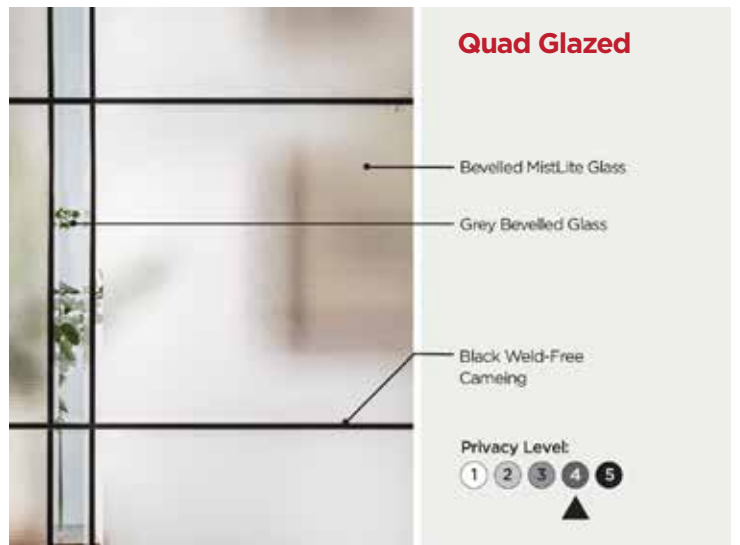

Triple-glazed

In contrast, triple-glazed units feature a centrally positioned decorative pane, providing a balanced look that you can see in the image on the left. Each option combines aesthetic appeal with outstanding thermal performance, ensuring your door looks beautiful while offering exceptional energy efficiency.

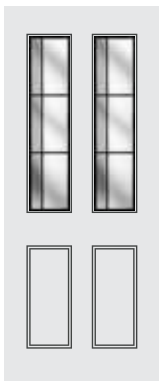

AURORA

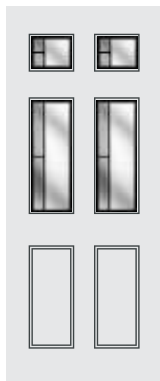

With its simple clean lines and contemporary patterned glass, Aurora is modernity at its best. Using the latest weld-free cameing technology in stunning matt black, the Aurora is a modern take on decorative glass which will complement beautifully any contemporary door.

NEW ORLEANS

The complex bevelled design combined with stunning textured glass creates a design with undoubted kerb appeal and 'Wow Factor'. New Orleans combines the opulence and architecturally inspired design flair associated with the 'Big Easy' and is undoubtedly set to become one of our most popular designs.

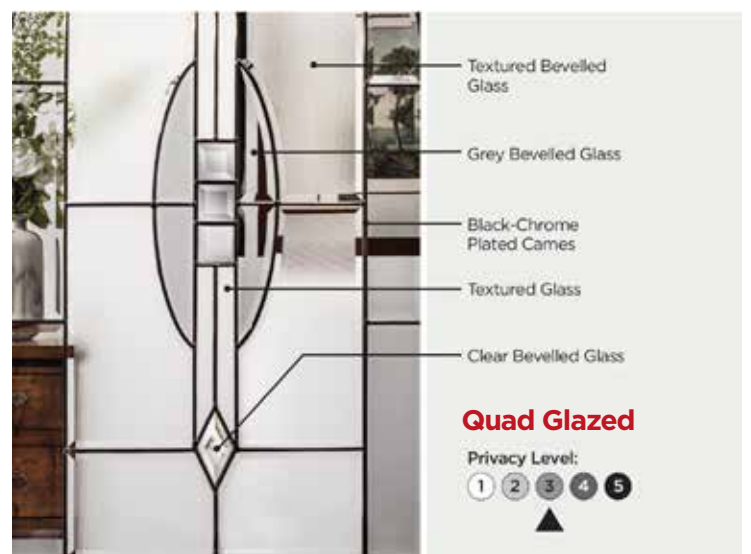

AVAILABLE DOOR STYLES

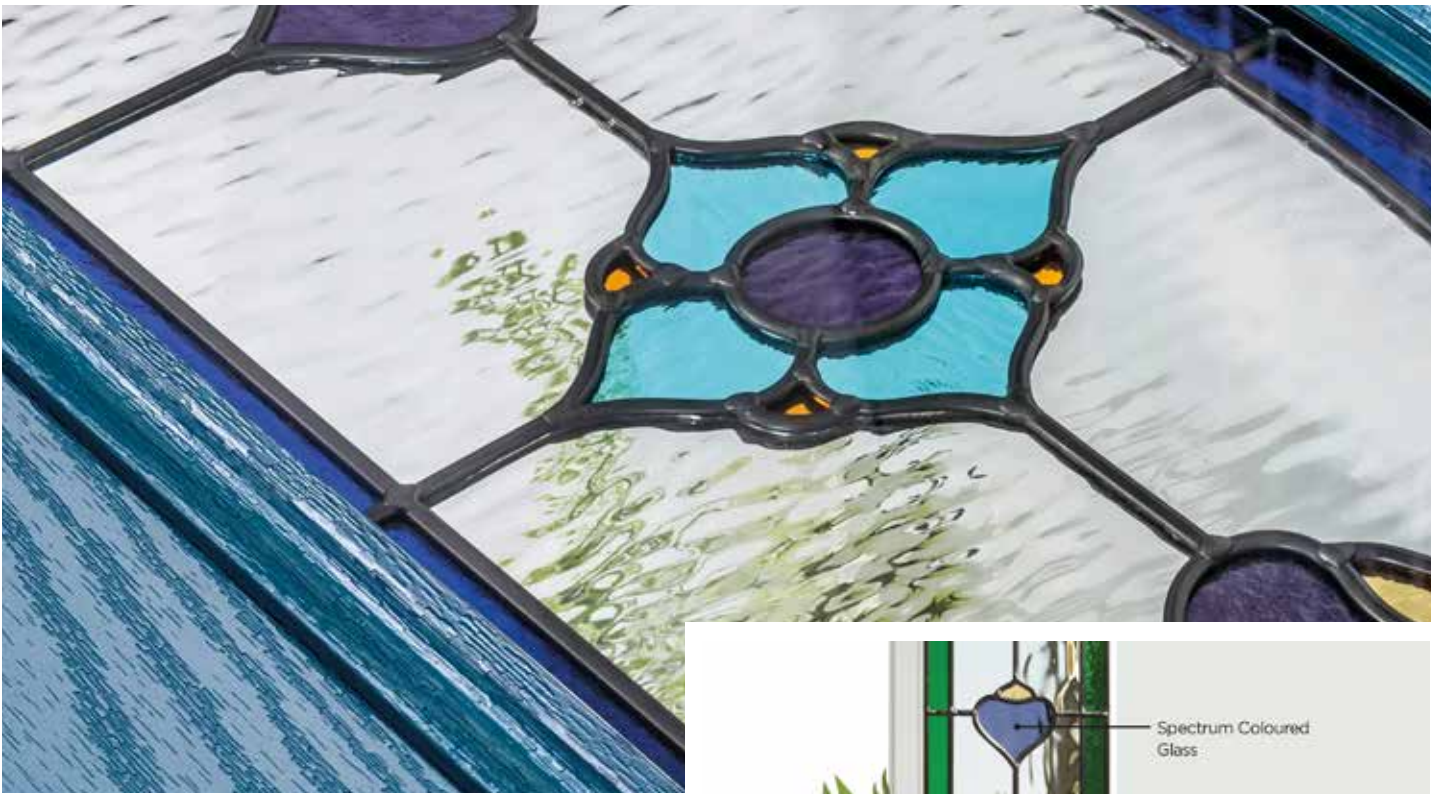

REFLECTIONS

This stunning contemporary design incorporates clear, textured and subtle grey glass in a striking design, where light beautifully refracts and reflects off the bevelled edges. The glass choices provide high levels of privacy whilst still allowing light to flood into your home. The design is manufactured using high gloss, black chrome cameing.

AVAILABLE DOOR STYLES

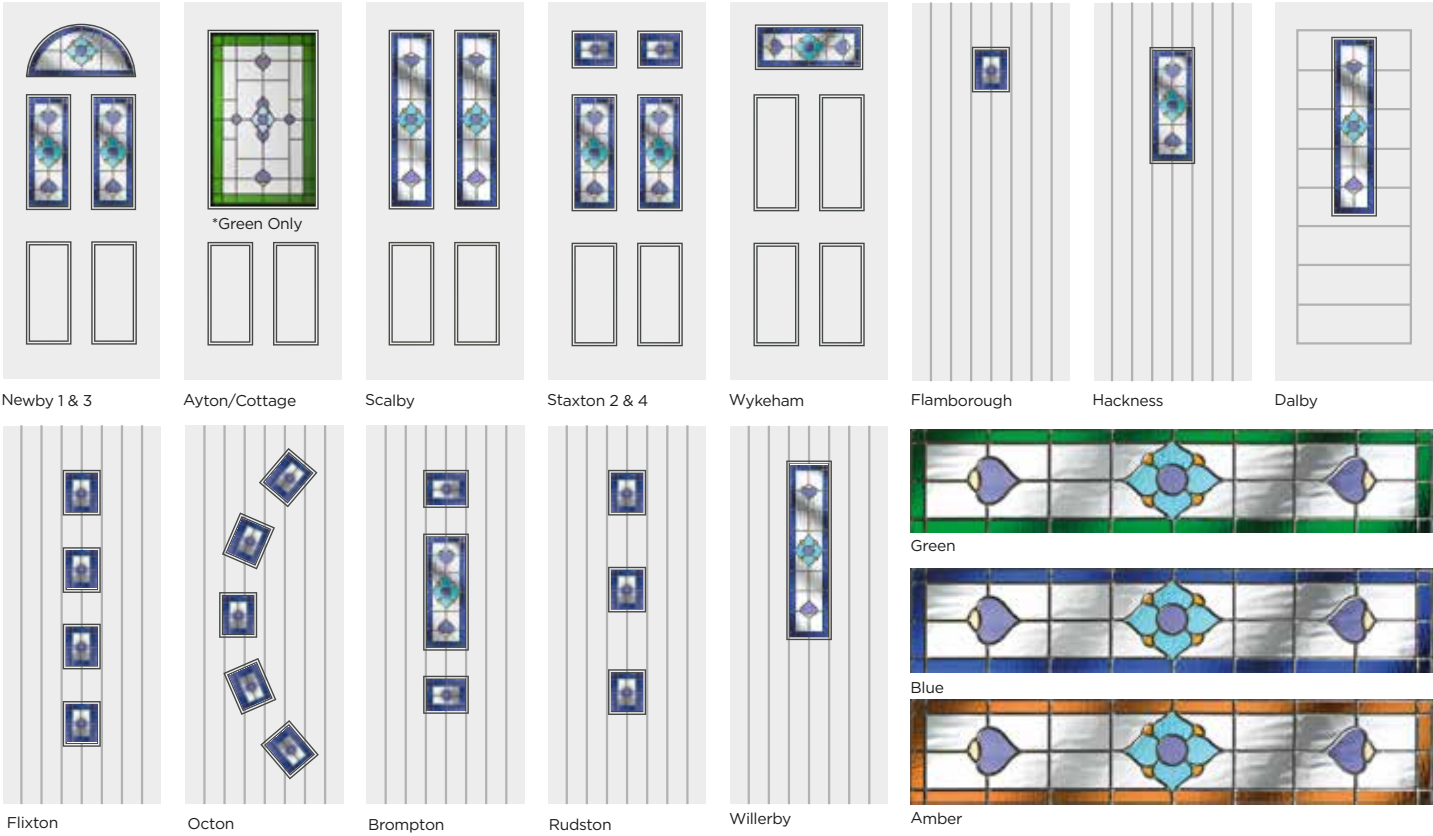

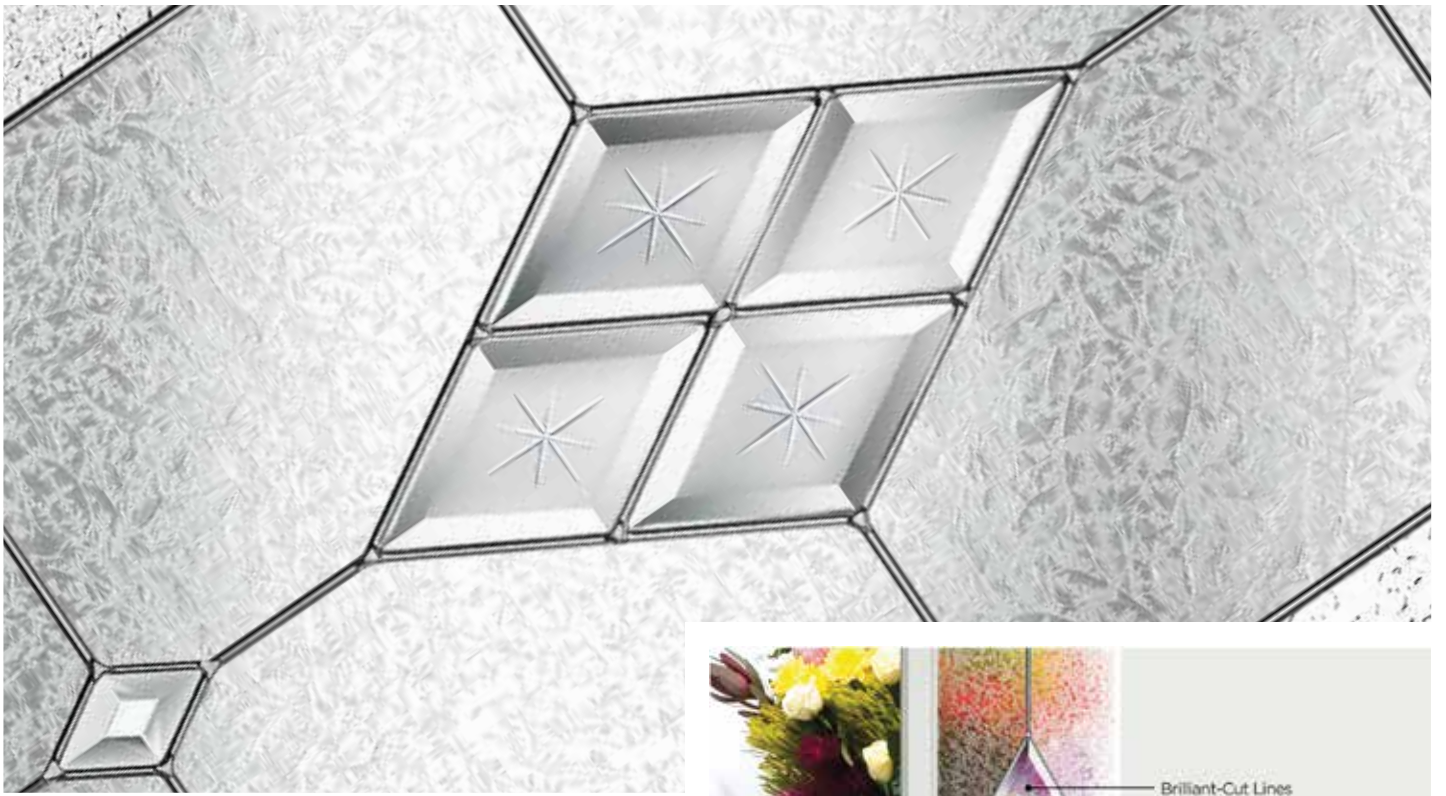

DORCHESTER

Genuine coloured Spectrum Glass with blackened comes combine to create this stunning leadlight design, reminiscent of the Victorian era. With Dorchester, you can now have all the benefits of traditional leadlights, with the performance and thermal properties you would expect in your door.

AVAILABLE DOOR STYLES

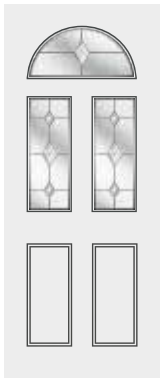

ELAN

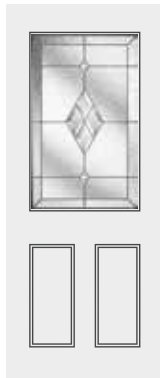

Featuring the ever-popular Glue Chip patterned glass, Elan features beautiful brilliant-cut bevels accompanied by clear glass bevels, complementing above and below. An incredibly popular design, it has a high level of light transmission with delicate design features.

HANDCRAFTED COLLECTION

Add a unique and personal touch to your door with our bespoke collection of handcrafted brass knockers. Designed to harmonize with our classic door furniture, each knocker is crafted with a similar, though not identical, colour palette, ensuring a complementary yet distinctive look. Made from premium brass, these knockers are built to last, developing a one-of-a-kind patina as they age. More than a functional detail, these accents make a refined statement, adding both style and personality to your SuperiDoor.

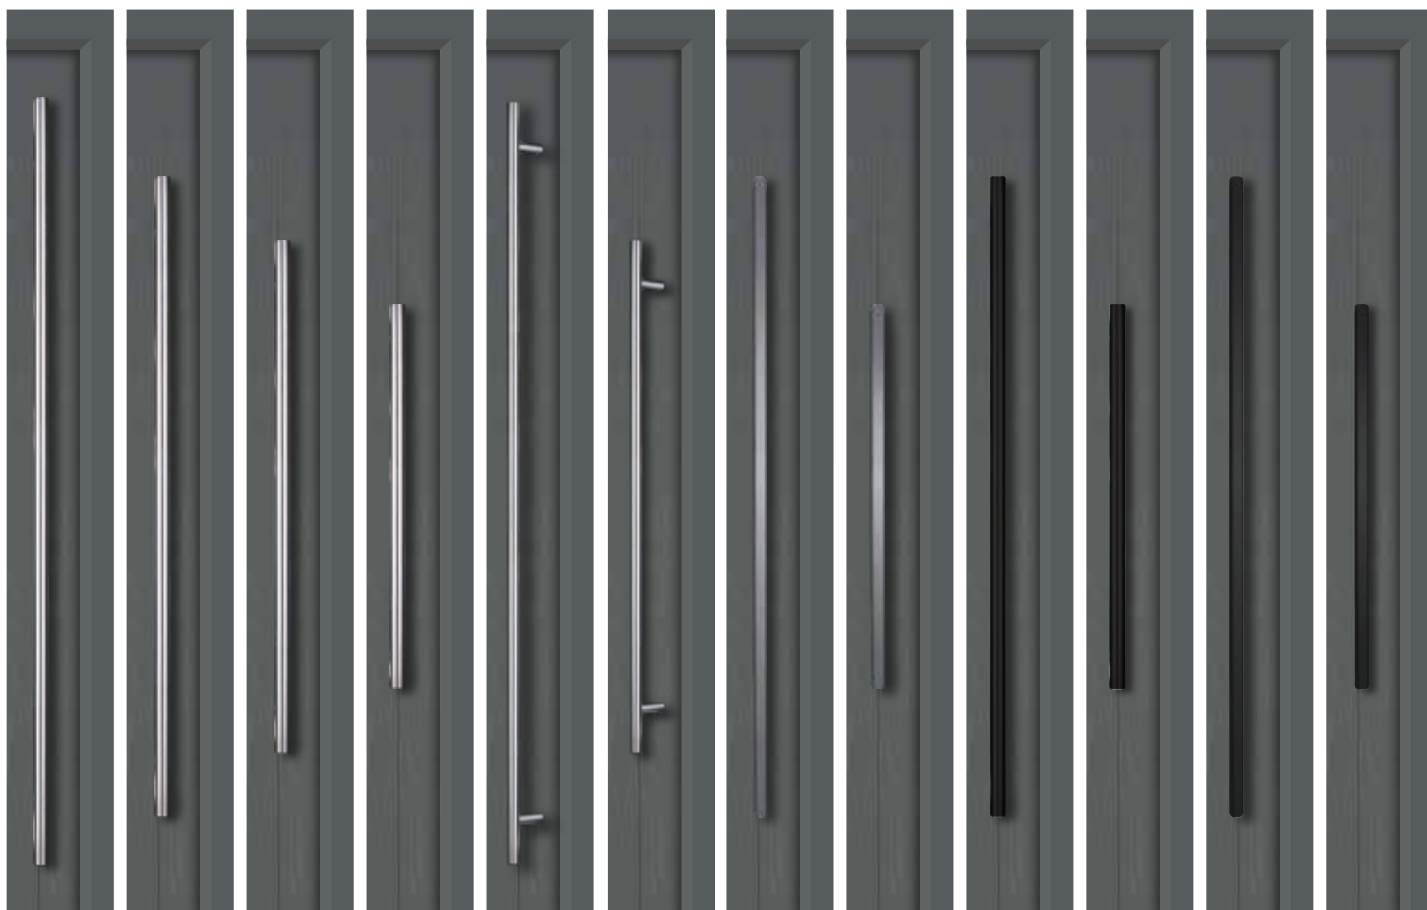

Our Handcrafted finishes are backed by a generous 2-year warranty, offering protection against corrosion while allowing the brass to naturally patina, adding depth and character over time. This finish is designed to age gracefully, creating a unique look that enhances its charm as the years go by.
