

# The Definitive COLLECTION

## High Performance

Windows & Doors for the Way You Live  
Beautifully Crafted in PVCu & Aluminium

# Our History & Philosophy

The philosophy for The Definitive Collection was driven by our desire to offer you products that have been designed and manufactured with a 'no compromise' attitude.

Regardless of the style of property you live in, we are sure to have a perfect solution to meet your design aspirations.

The Definitive Collection offers you a comprehensive choice of products either from our classically styled sculptured range or from our more contemporary styled chamfered range.

High performance solutions are available to suit any application, whether you are looking for a sympathetic window replacement for your 18th century farmhouse, or a more contemporary look for a modern house or city centre apartment. You can even have your window, door or conservatory in any colour you want! Your decision... Your choice.

With The Definitive Collection, quality is not only a promise... it is also our philosophy.

## Why you should buy Definitive

**Weatherproof**

**Accredited**

**10 Year Guarantee\***

**Large Locally Based Installer Network**

**High Quality Materials**

**Made In Britain**

**Energy Efficient**

**Stylish**

**Strong & Secure**

Please Note: Guarantee periods vary by product and may not extend to 10 years in all cases. Full guarantee details should be discussed and confirmed with your installer. To ensure continued product performance and warranty compliance, please refer to our Cleaning & Maintenance Guide, available via the QR code on page 74.

“Purposely brought together to offer a wide range of PVCu and Aluminium windows, doors & conservatories, The Definitive Collection is tailor-made to give you affordable luxury.”

# Crafted Through Heritage. Engineered for Performance.

Choosing new windows and doors is a significant investment and one that should deliver confidence, comfort, and peace of mind for many years to come. Unlike many off-the-shelf products, you are purchasing a bespoke solution, carefully tailored to suit your home in much the same way a finely tailored garment is made to fit perfectly.

So what's behind the brand? Since 1989, our journey has been driven by one simple belief, Windows and Doors should never be judged solely by how they look, but by how they perform every single day for years to come.

At The Definitive Collection, heritage matters. Over decades we have refined, tested, developed, and perfected products that combine timeless aesthetics with exceptional engineering. Every component we use has been carefully selected

from some of the strongest and most respected brands in the industry, manufacturers with their own proud histories, reputations for innovation, and uncompromising standards of quality.

**Because while many Windows and Doors may appear the same, they most certainly do not perform the same or have the same longevity.**

Every property is different, which is why we offer a wide range of options to complement your lifestyle, location, and design preferences, enhancing not only the appearance of your home, but also its comfort, efficiency, security, and long-term value. From thermal performance and glazing options to hardware finishes, security features, and styling details, every choice is designed to help you make the very most of the products you use and see every single day.

**Behind every Definitive Collection product lies an unwavering commitment to excellence in:**

- Energy efficiency and thermal performance
- Security and protection
- Durability through the rigours of daily use
- Weather resistance and long-term reliability
- Precision engineering and smooth operation
- Acoustic performance and comfort
- Rigorous testing and continual product development

**Exceptional windows and doors are designed to do far more than enhance the appearance of your home. They should deliver outstanding performance, effortless operation and lasting reliability, making every day more comfortable while protecting your investment for the future. Unfortunately, some companies buy purely on price, and with that often comes compromise. There is truth in the saying: the bitterness of poor quality remains long after the sweetness of low price is forgotten.**

A Definitive Collection installer does not choose us because we are the least expensive. They choose us because they trust our reputation for quality, consistency, performance, and the culture of excellence we have built since 1989. They know every product has been developed to meet the highest standards, using only proven systems and premium components designed to stand the test of time.

We continue to invest millions of pounds into innovation, manufacturing, testing, and people, because maintaining exceptional standards requires continual improvement.

After all, the very best we can be is the very least you should accept.

**“Choose Wisely, Choose Confidently,  
Choose The Definitive Collection.”**

## Why buy local?

Choosing a trusted, well-established local business is increasingly the wisest decision when investing in new or replacement Windows and Doors.

In contrast, many national brands have come and gone over the years, often reappearing under the same name and logo but with different ownership. While the branding may suggest a long and continuous history, these are frequently entirely new companies with no direct connection to the original business and a much shorter track record than many people realise.

For a truly personal experience, buying local can make all the difference. Local companies depend on their reputation within the community and take pride in supporting it, whether through sponsorships, fundraising, or involvement in local initiatives.

The Definitive Collection is a strong regional brand built on these very values. We are deeply connected to our communities, supporting fundraising projects, youth sports teams, and family-focused initiatives. Our installer network shares this same ethos, which is why they choose to work with our products.

It's not about choosing the lowest price, but about investing in quality, service, and long-term performance. Established in 1989, many of our installers have trusted our products for over 30 years. We remain focused on continuous product development, exceptional customer experience, and delivering genuine value.

As a trusted manufacturer, we've earned the loyalty of some of the most respected regional companies, many with family reputations spanning generations. Homeowners return to us time and again, whether improving a new property or recommending us to friends and family.

**We are incredibly proud of the culture we've built. Our success is shaped by the strength of our relationships, with our suppliers, our people, our installer network, and you, the homeowner - all of whom play a vital role in our future.**

From Trusted Installers

# Our home improvement products are now more energy efficient than ever!

## Windows that won't cost the earth...

Our products are now more energy efficient than ever. Less heat loss will also impact positively towards reducing your heating bills, not to mention the positive contribution you will make towards reducing your carbon emissions.

All PVCu material used in the manufacturing process is stabilised with environmentally friendly and sustainable calcium zinc. We also ensure that our supply chain has comprehensive environmental policies in place to ensure that stringent recycling measures are implemented.

Offcuts of profile waiting to be recycled

“The beauty is that you can combine the looks and charm of a traditional timber window with the functionality and economic benefits of a modern PVCu or Aluminium equivalent.”

## Window Energy Ratings (WERs) ...what are they and why should we care?

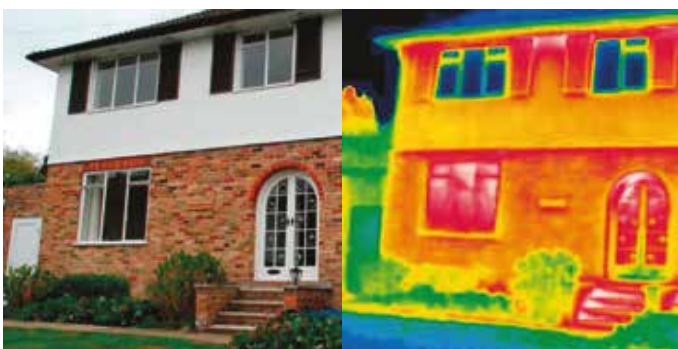

Modern windows are now manufactured and rated using a scale of A++ to G as seen on items such as washing machines and dishwashers etc. This rating indicates the energy efficiency value of your window, with an A++ rating being the highest you can get (or top of the class!).

Energy efficient products result in less energy being lost, which in turn helps reduce the heating bills and supports a reduction in carbon emissions.

The Definitive Collection range of PVCu windows are available in a certified A, A+, and A++ rating licenced by the ER Certification's part 'L' Compliance scheme (PLC). Energy rated products should be viewed as a cost-effective investment.

We now supply A+ double glazed & A++ triple glazed windows which are optional to our standard A rated double glazed windows, please speak to your Definitive Collection installer for more details.

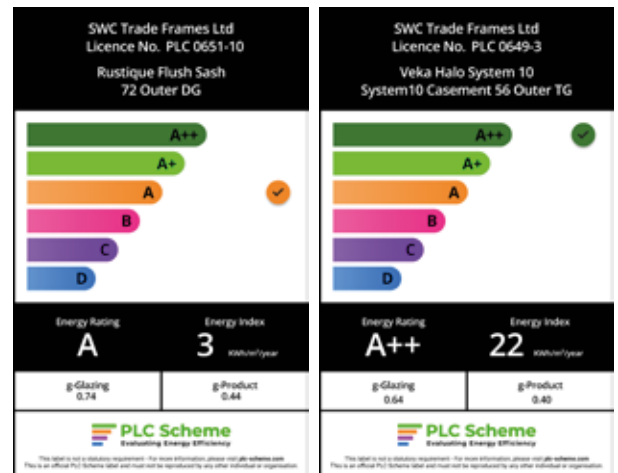

**"The Government is determined to meet its Kyoto commitment to reduce CO2 emissions through energy conservation. Energy Rated Windows have an important role to fulfil in supporting this agenda."**

## See the difference...

Using a thermal imaging camera, the images of the house above show just how beneficial the new energy-efficient first floor glazing is against the older ground floor glazing. The ground floor windows are glowing red with a heat signature that clearly demonstrates heat being lost through the glazing.

Please note: Our aluminium range is supplied on request with 'U' values not energy ratings.

The energy labels are for reference only and apply only to specific PVCu products. The energy performance will change depending on profile and glass specification

### Warmer and More Secure...

The inside pane of a triple glazed unit can be around two degrees warmer than standard double glazing and the third pane of glass also makes it more difficult for a potential intruder to break in through the glass.

### Quieter...

A typical triple glazed window has a sound reduction of approximately 31dB (this value excludes the frame). Please note for increased acoustic performance other options are available.

### Safe in the Knowledge...

Some windows and doors may look the same but they do not all perform the same. The ethos of The Definitive Collection is to ensure that you receive the very best performing components across our full range of products.

**U-Value** Shows how much heat escapes through a window or door. The lower the number, the better the insulation.

**Energy Rating** Shows the overall energy efficiency of a window or door. It considers insulation, sunlight entering the home, and air leakage. The higher the rating, the more energy-efficient the product.

In simple terms: **U-Value** tells you how much heat stays in. **Energy Rating** tells you how well the whole window or door performs.

# Designed for life

Windows and Doors have become a lifestyle choice and a smart investment, with design statements that capture traditional or contemporary living whilst adding value and incorporating all the benefits of modern performance benefits.

## For the way you live

The way we live is constantly changing and evolving with Windows and Doors being no different, and there are now many alternatives to what was once considered standard. The Definitive Collection is a luxurious brand that complements sophistication with style, performance and comfort for versatile living which is essential for the modern day family. Although change can be challenging, the bringing together of these vital elements will undoubtedly be a rewarding experience and ultimately contribute towards your well-being.

# Smart Glazing with High Performance in Mind

Insulated glass units can be made up using several considerations including, Energy, Light, Security, Noise and How to keep Clean. The majority of modern insulated glass units come with features such as argon gas and warm edge spacer bar.

Gases like argon are preferable to air because air contains moisture that can condense on the inside of the glass units, making the window cloudy. Air also insulates less effectively than gas fills.

## Low-E Glazing

Low-Emissivity glass or Low-E is a type of energy efficient glass designed to prevent heat escaping out through your windows & doors. Low-E coatings have been developed to minimise the amount of ultraviolet and infrared light that can pass through glass without compromising the amount of visible light that is transmitted. This is where low emissivity (or low-e glass) coatings come into play.

## Self-Cleaning Glass

Self-Cleaning glass is exactly as the name suggests - glass that keeps itself clean. It uses an organic process whereby dirt is broken down by daylight and is then washed away by rain. In those hard to reach areas the time and energy that goes into keeping windows looking great has encouraged many home owners to make the change to Self-cleaning glass.

## Integral Blinds

Integral Blinds are proving a very popular solution for maintaining temperature, privacy and glare whilst also providing UV protection for valuable furniture. Unlike conventional blinds that are difficult to clean, integral blinds are enclosed within the cavity of the hermetically sealed glass unit, therefore keeping them clean forever. Available in a wide range of styles and colours.

**Guarantee:** Integral Blinds are covered by a 5-year guarantee. External blind components are covered by a 2-year guarantee.

## Toughened Glass

Toughened glass is another type of safety glass processed by controlled thermal treatments to harden the surface. Toughened glass is always used in high risk areas such as doors and low level windows. When broken, it shatters into smaller granular chunks that are less likely to cause injury.

## Superior Triple Glazing

Triple Glazing has been around for many years, but until very recently most triple glazed products have incorporated 28mm thick units. This thickness is more commonly found in double glazed windows. Our triple glazed units are 40mm thick. Our advanced triple glazing features thicker insulated glass units delivering enhanced thermal performance and improved energy efficiency by up to 40% - a genuine saving on both energy and household bills.

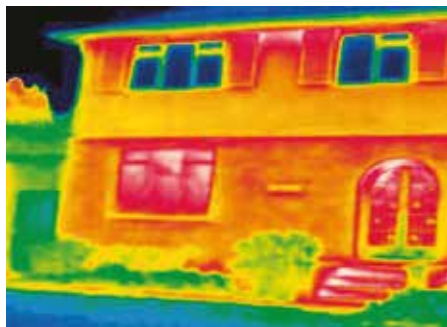

## Acoustic Glazing

Acoustic insulated glass units considerably reduces outside noise to offer a peaceful and tranquil living space. Acoustic laminated glass is a sandwich of two or more sheets of glass, heat or pressure bonded together with one or more acoustic polyvinyl butyral (PVB) interlayers. The interlayers act as a noise damper, weakening the energy of the sound waves as they travel through the glass.

## Warm Edge Spacer Bar

Warm Edge spacer bars insulate the edges of a sealed unit and keep the panes of glass apart. Warm Edge spacers are generally made up of an insulated composite material that becomes a barrier to heat loss. Warm edge spacers also reduce condensation and external noise, an altogether smart choice. No matter where it originates, from railways, aircraft or factories, noise is all around. Future trend research suggests that traffic and noise in general will only get worse. The careful and considered selection of glass can be crucial in helping to reduce noise levels and meet noise requirements.

## Laminated Glass

Laminated Glass is a type of safety glass that holds together when shattered. The two panes of glass are held in place by a clear polyvinyl butyral interlayer. Because of its strength, Laminated Glass is often used for both safety and security.

## Georgian/Authentic Bar

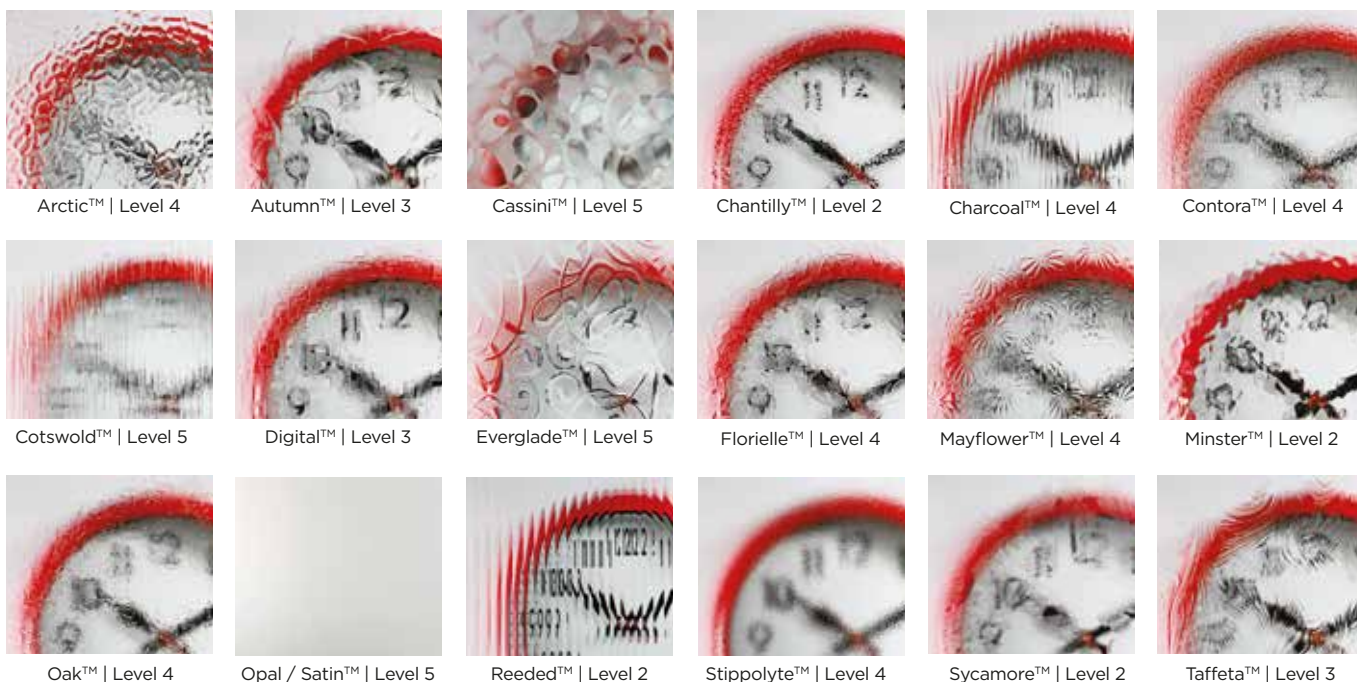

So what is the difference? Georgian bar is fitted within the cavity of the sealed unit and can be supplied in 18 & 25mm thickness. The 20mm Authentic Bar is a premium glazing option, fixed to both the inner and outer panes of the sealed unit and complemented by an internal spacer bar to replicate the appearance of traditional individual glass panes. Available with a single horizontal or vertical bar, or in a range of cruciform grid designs, the Authentic Bar offers a timeless heritage look. An ovolo design is available for System 10 and Rustique, while a putty-line design is available for Omnia and System 10.

## Decorative Glazing

To help inspire your design choices, we are able to offer you a full range of decorative glass options in a variety of designs & styles to complement the style of your home. Included in the style options you will find handcrafted authentic looking georgian bars, stained, bevelled and leaded glass.

## Obscure Glass

Five levels of privacy on our Pilkington Textured Glass are available, graded from 1 (least obscure) to 5 (most obscure)

All of the above Obscure Glass images are provided by and copyright of Pilkington plc.

# Keeping Your Family Safe

As one of the oldest international brands, Yale is among the most respected names in the lock industry, with millions of Yale locks in use worldwide.

You will be comforted to know that our PVCu & 44mm Composite doors are fitted with the world's leading lock brand Yale as standard with the exception of our contemporary door range which are fitted with Winkhaus key-wind locks. Both Yale and Winkhaus products are accredited with 'Secured by Design'.

The Winkhaus 'Thunderbolt' key-wind lock is used in conjunction with our stainless steel bar handles or any door supplied without a lever handle. The euro cylinder (where you put the key) is positioned higher up the door. When the door is closed the lock will engage on the latch only. To lock or re-open the door from outside you will need to use the key.

## Latest technology

The Definitive Collection offers you the latest technology in high security cylinders to provide the ultimate resistance against all known attack methods.

The euro cylinder lock (which is where you put your key to lock the door) is the single most important safety feature on any door. The Yale cylinder carries the highest accreditation available in the UK, All of which is demonstrated on page 14.

## Reverse action multipoint locking providing superior security

Fitted as standard to both our PVCu and Aluminium Casement Windows the multipoint reverse action inline locking system clamps to both sides of the striker plate for increased security.

**Our Composite Doors come with 5 keys as standard and all other doors come with 3 keys.**

Open

Closed

## Protected by Yale

A name trusted in security for over 180 years

Please note: selected doors in our range, such as the SuperiDoor, include an Ultion cylinder as standard.

# Yale Platinum Ultra 3 Star Cylinder

**Inner strength** - Dedicated central bridge delivers protection from external attack.

**Anti-Snap** - The external section of the cylinder is designed to snap under attack, leaving your home safe and secure.

**Anti-Bump** - Specialised side pins provide bump resistance.

**Anti-Pick** - The unique technology features a combination of tumbler and side pins, designed to resist lock picking.

**Anti-Drill** - Hardened steel protection incorporated in the cylinder provides resistance against drill attacks.

**Anti-Freeze** - A specialised protective shield prevents intrusion by resisting ice-based methods used to tamper with the mechanism.

**Anti-Glue** - Specifically designed cylinder clutch protection prevents attacks using glue.

3 Star Rated  
**The Highest Available**

**Secured by Design**

**Police Preferred Specification**

Our doors including PVCu Residential & French Doors, 44mm Composite Doors, and SuperiDoor have been independently tested to PAS 24:2022 standards and have achieved Secured by Design accreditation, providing enhanced security and peace of mind. SBD requirements may include upgrades, which should be confirmed with your installer.

## Enjoy total peace of mind with Yale Lifetime Total Trust Guarantee

Across the world, millions of people protect everything they care about - their families, homes and personal belongings - with Yale, the best known and most respected name in home security.

Designed, developed and tested by the UK's most trusted lock company, the Yale Platinum Ultra 3-star cylinder is so secure that if your home is broken into during a burglary, it's backed by Yale's £5,000\* security guarantee, including a £1,000 goodwill payment to apologise for the inconvenience caused.

\*All Yale Cylinders must be registered within 30 days of installation at [help.yale.co.uk](http://help.yale.co.uk)

Up to £5,000 total cover across repairs, replacement, insurance excess and goodwill payments. Terms apply.

## Anything but standard.

### We are Document Q approved! But what does this mean ?

In 2015, changes were made to Building Regulations which are outlined in Approved Document Q.

All New Build homes started after October 2016 must meet the enhanced security requirements of Document Q. (ADQ does not apply to any extensions, Sun rooms or Conservatories)

To comply with Document Q, our windows and doors must by law feature upgraded security enhancements via the cylinder, slab and glass. This is an upgrade available on our doors, they do not come Document Q approved as standard.

If you are unsure if this applies to your windows and doors then you must speak to a Registered Building Inspector.

**Did you know...** Over 70% of all burglaries are accessed through a door, yet there is no minimum security standard in the UK for replacement doors. Rest assured that all Definitive Collection doors are fitted with Yale or Winkhaus multi-point locks and 3 star high security euro cylinders as standard.

# Express Yourself - Living Life in Colour

The Definitive Collection now features a range of desirable timber effect and textured colour finishes that combine all of the high performance features and functionality that you would expect from modern PVCu windows.

This cost effective, energy efficient and easy to maintain alternative to wooden windows are an ideal solution for home-owners who prefer the textured aesthetics of natural wood.

This premium PVCu product can update a traditionally designed property whilst maintaining its original and authentic character. It can also provide a modern contemporary styling for newer properties, particularly in city centre locations which often require an 'industrial look' to blend with their surroundings.

The creation of a woodgrain effect is achieved by using a durable foil that has been specially laminated on to the PVCu profile.

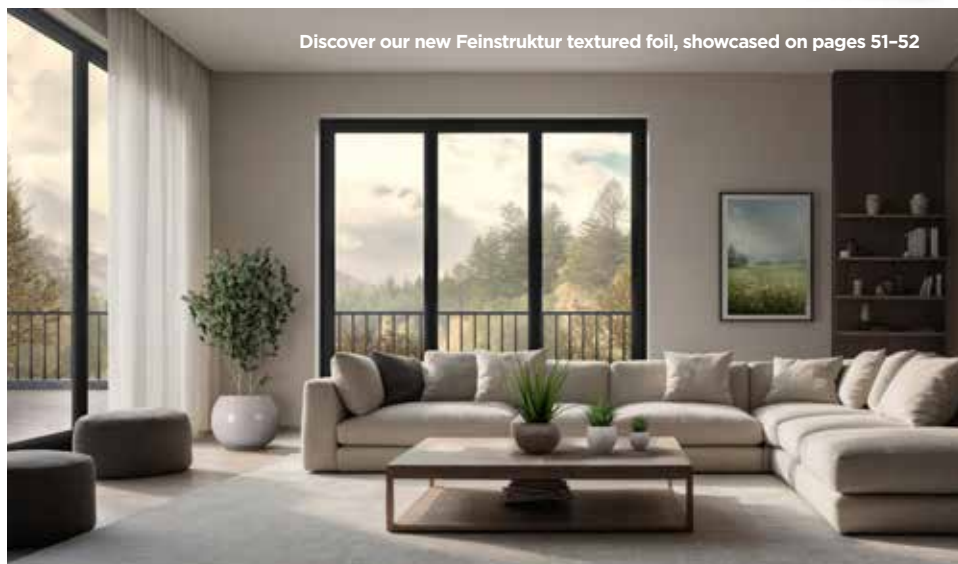

Each bespoke woodgrain and coloured foil is individually engineered to withstand the rigorous British climate including direct sunlight, heavy rainfall, strong winds and heavy frost. Once applied to the PVCu profile it is then manufactured into doors and windows that carry a **Comprehensive 10-Year Guarantee**.

combinations”

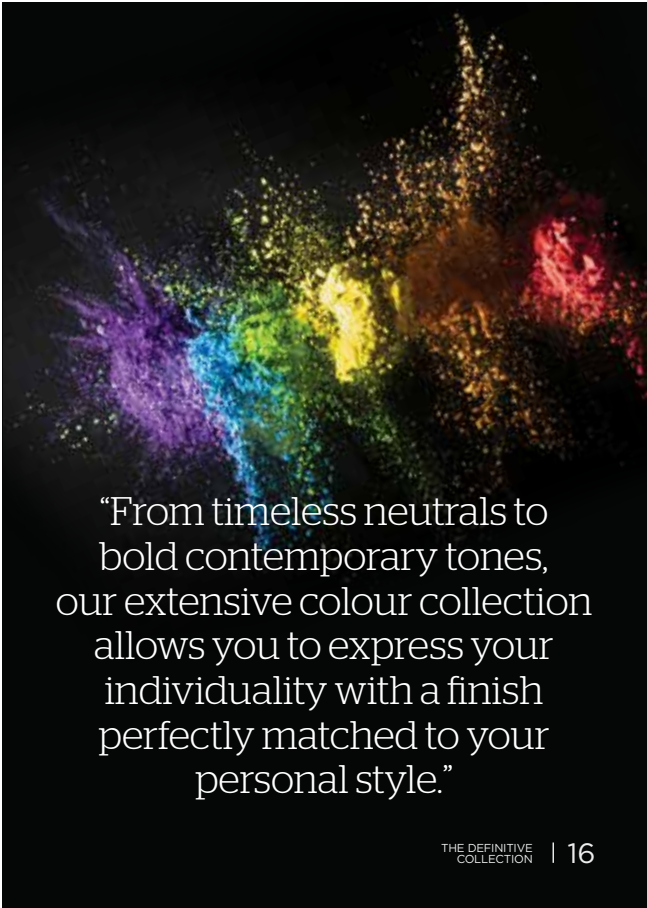

## Bespoke Painted & Powder Coated Colours\*

The Definitive Collection range can be supplied in any colour for a small premium. All we need is a RAL colour or recognised BS reference, and your new windows and doors will represent your individuality.

A Definitive Collection installer will guide you through the process to help create your perfect colour. All windows and doors are supplied using a satin finish.

The colours of the windows, doors and glass shown in this brochure are for guidance only and may vary owing to the limitations of the photographic reproduction and printing processes.

\*Please note, all bespoke painted colours carry a 5 year colour fast guarantee. All powder-coated aluminium products carry a 10 year guarantee. Please make sure you adhere to the correct cleaning and maintenance schedule for your chosen product(s). Bespoke RAL colours displayed are a representation only, we cannot guarantee an exact colour match due to the limitations of the photographic, reproduction and printing processes.

“From timeless neutrals to bold contemporary tones, our extensive colour collection allows you to express your individuality with a finish perfectly matched to your personal style.”

# An Eye for Detail

To keep up with marketplace demands, we have specially sourced a wide range of durable hardware in a good selection of colours and finishes, guaranteed to add those individual finishing touches. These have all been designed to withstand the rigours of the British weather and will still look good in years to come.

## THE CLASSIC RANGE

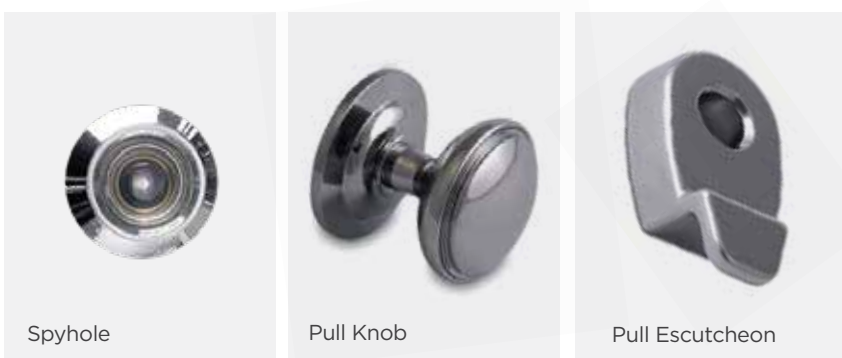

## KNOCKERS

## SPYHOLES

## PULLS

## LETTERPLATE

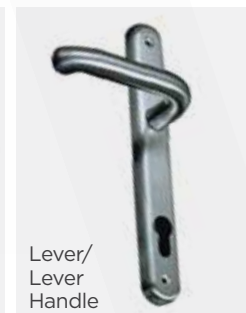

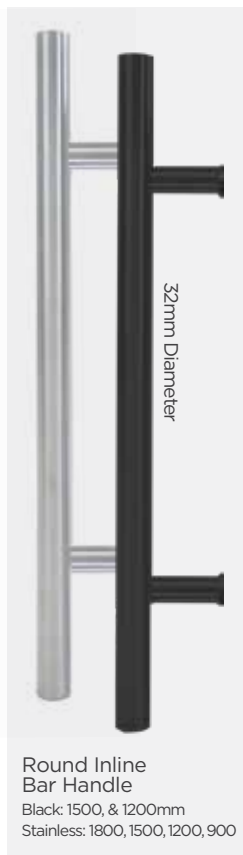

NB: A 'Pull Knob' is usually used with a 'key wind door' and will be fitted to the outside of the door. Ask your installer for details. A key-wind door will be supplied with a thumbturn cylinder.

## THE STAINLESS STEEL DOOR RANGE

Alternatively, you can upgrade to our Stainless Steel range! Please note all bar handles are fitted back to back and used in conjunction with a key-wind lock. Bar Handles available on Aluminium Residential Doors & Composite Doors.

For the ultimate in contemporary design, choose the exclusive new Textured Matt Black range.

# The Definitive COLLECTION

## THE PVCU COLLECTION

PVCu offers many advantages, making it an excellent choice for modern Windows & Doors. Most commonly used as a low cost alternative to timber and aluminium, PVCu is a versatile material that provides great design, and high levels of thermal efficiency whilst being extremely durable with minimal maintenance to keep them looking their best for many years to come.

Good exterior design plays a vital role in creating a great first impression. Nothing packs a greater punch than strong architectural design to enhance the look of your home.

System10

Fully Chamfered styling...

“Both systems carry a 10 year colour fastness guarantee via your installer.”

*Rustique*

Fully Sculptured styling...

VEKA is the most specified profile in the world

# One philosophy... ...two choices

As a discerning customer, you will wish to choose a high performance product that is both environmentally friendly and in keeping with your individual property

## **An aesthetically pleasing finish...**

The Definitive Collection windows are manufactured using a fully welded construction method to produce a superb, robust and beautifully engineered finish.

## **With your security and safety in mind...**

With an increasing demand for improved home security, all The Definitive Collection windows incorporate multi-point locking devices with the option of hinge protectors and locking handles. Safety features such as fire escape hinges are fitted to side opening casement windows as standard. These can be replaced with child restrictors if required.

## **Hardware...**

Both chamfered and sculptured systems can be fitted with a range of matching handles, letterplates and door knockers in a choice of colours

## **Extra strength...**

Both chamfered and sculptured systems have galvanised steel reinforcing inserted into the profile to provide additional strength where required.

## **SCULPTURED**

A classically sculptured definition that perfectly replicates the look of traditional ovolo timber frames but with all the benefits of 21st century technology.

## **CHAMFERED**

An elegant chamfered design which emulates the putty line of a more modern timber frame, but with all the benefits of 21st century technology.

Undoubtedly you will also want to consider enhanced security at a time when crime is more prevalent in our society

### **Designed to withstand the British weather...**

The Definitive Collection windows are fully weather tested to withstand the tough British climate and are internally glazed as standard. They also feature unobtrusive gaskets which form a double seal around every point.

### **Meeting our social responsibility...**

Environmentally friendly materials are used in the manufacturing process to support the reduction of CO2 emissions. Add to this the fact our main components are 100% recyclable and come with a first class energy rating pedigree... then why look any further?

### **Traditional Furniture Option**

Monkey Tail and Pear Drop handles can be supplied with matching dummy stays for an authentic heritage appearance.

Please note that when using triple glazing, dummy stays are not available on the System 10 or Rustique ranges, but are available on the Omnia range.

### **Optional Hinge Bolts**

Delivering multi-point security

### **Reverse action Multipoint Locking**

Providing superior security

### **Friction Stays**

Available in Egress easi-clean (side hung only) and restricted

### **Key Locking**

Casement window handle

### **Wrap around lock**

The wrap-around lock is fitted to taller top-hung casement windows, where the wrap-around roller locking system helps provide enhanced sealing along the full height of the vertical sides.

Please note: that this option is not available with a night vent facility.

### **Trickle Vents**

Adjustable internal tumbler and external built in fly screen. Please speak to your installer about ventilation, current building regulations and how it affects you.

### **Stud and Catch Restrictor**

The stud and catch restrictor is a simple and easy-to-use safety feature, typically fitted to side-hung casement windows to provide controlled opening.

## Casement Windows

The Definitive Collection casement range has a wealth of different designs for you to choose from whether your property type is traditional or modern

Casement windows remain the most popular, practical and versatile solution for replacement windows. And, because each window is tailor-made for your home, you can be as creative as you like in the design.

Casement windows can be locked in a night vent position for ventilation. You can also choose to have restricted hinge openings to keep the children safe. 'Easy-clean' openings on casement windows come as standard on all side opening windows. This makes cleaning much easier in those harder to reach places!

Please note that tall top-hung sashes fitted with the wrap-around lock detailed on page 24 do not support locking in the night-vent position.

# Tilt & Turn Windows

Specially designed with practicality and functionality in mind!

They enable you to have a quick means of escape in the unlikely event of an emergency occurring. The first rotation of the handle will allow the top of the window to tilt back into your room to provide natural ventilation.

A further rotation will allow you to pull the window fully inwards towards you, which will allow you to clean the outside very easily. It can't do the cleaning for you, but the tilt and turn mechanism is a step in the right direction!

The Tilt & Turn energy rating shown is for illustrative purposes only and is based on a configuration incorporating triple glazing and a 56mm outer frame.

Traditional Horned Casement above a Tilt & Turn

## Run-through Sash Horns & Authentic Bar

Designed to give an authentic appearance

These decorative effect horns are designed to give an authentic appearance mimicking the look of a traditional box sash window.

20mm Authentic Bar is a plant on glazing bar that is fitted to both the external and internal glass pane giving the effect of traditional Georgian period features. The insulated glass unit also has internal spacer bars that divides the authentic bar design giving the appearance of a multi-paned window.

## French Doors

Enhance the flow of natural light into your home with French Doors.

OMNIA

This image showcases our latest Omnia Flush Sash French Doors, beautifully crafted to perfectly complement the wider Omnia Window and Door collection.

Our stunning range of French Doors have all the benefits of a window, but with the added benefit of combining elegance and easy access into your home, garden or conservatory.

French Doors in particular are increasing in popularity. Not only do they enhance the flow of natural light into your home, they are also manufactured with a high standard of security.

As with all The Definitive Collection products, tried and tested product development means that our range not only looks great, it is also high performing in terms of security and weather performance.

# Residential Doors

Whether you are looking for a new front or back door, we have the perfect solution.

Within our extensive collection of residential door styles, available in classic white or a wide choice of contemporary and traditional colour foils shown on page 15, the possibilities are almost limitless and only your imagination sets the boundary.

Each door is fitted with a high-security Yale 10-point locking system and the latest Yale 3 star Platinum Ultra cylinder, helping to protect your home from unwanted intruders.

The modern PVCu residential door has evolved significantly, reimagined through creative design, improved performance, and enhanced security. With a wide choice of glazing, door furniture, threshold options, and additional security upgrades available, today's residential door is a stylish, practical, and a secure choice for any home.

# OMNIA

**Omnia** is Latin for 'everything' and that perfectly captures the philosophy behind our Omnia Flush Sash Window and Door Collection.

Designed as a complete and coordinated range, Omnia includes Flush Sash Casement Windows, Tilt & Turn Windows, Residential Doors and French Doors, all available in a carefully curated palette of colours to complement both traditional and contemporary homes.

Few products can effortlessly bridge the gap between heritage and modernity. Omnia feels equally at home in period properties rich in character and history as it does in sophisticated contemporary architecture. Combining elegant flush aesthetics, exceptional attention to detail and outstanding performance, the collection delivers timeless style without compromise.

For homeowners seeking something truly distinctive, Omnia offers a luxurious range of flush sash windows and doors that blends beauty, versatility and craftsmanship in every detail.

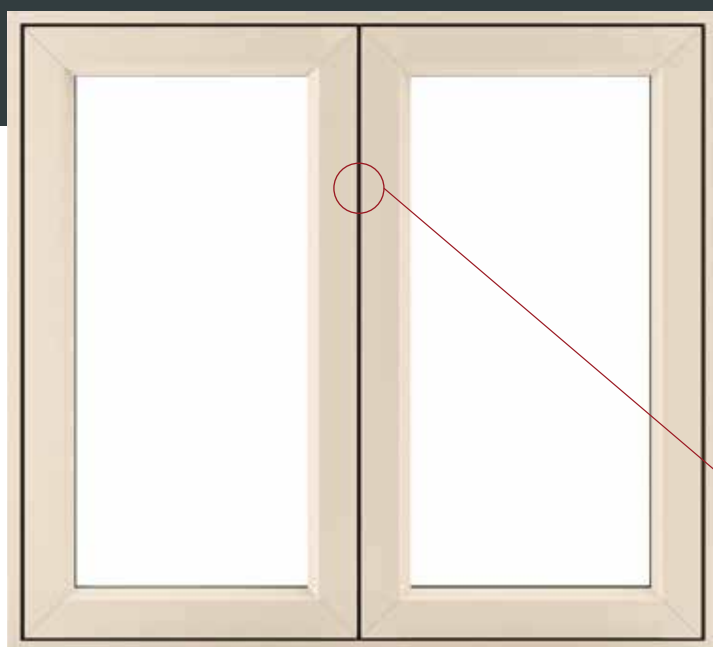

## Your Home. Your Design.

Omnia is designed to be as individual as you are. With a wide choice of stunning finishes and expertly crafted welded options, including our authentic Timber-Look finish, Omnia delivers a beautiful, durable, and low-maintenance alternative to traditional timber.

It captures the timeless appeal of wood without the ongoing upkeep, giving you the freedom to create a truly bespoke look that reflects your personal style.

While many windows may appear similar, they are not all created equal. With Omnia, you are choosing a window and door system that blends heritage-inspired design with advanced performance. It's proof that exceptional design lies in the finest details.

### Invisible mullions

Omnia Windows come with invisible transoms and mullions, maintaining a sleek and unobstructive aesthetic both inside and out.

For larger window configurations, a wider visible transom is required to ensure both structural integrity and balanced aesthetics. Please refer to page 34 for details.

### Optional TimberLook jointing

OMNIA provides versatility and compatibility with leading jointing methods, offering enhanced structural integrity and longlasting performance.

### 70mm frame depth

A quick and simple retrofit solution offering greater flexibility, with hasslefree replacements or upgrades without extensive modifications to existing structures.

## Concealed Trickle Vent

Exclusive to our Omnia Flush Sash range is the option of a concealed trickle vent. This feature is not included as standard and is subject to a satisfactory window and door survey to confirm suitability.

The concealed design incorporates a trim cover that hides an external fly-screen, providing a cleaner appearance. Please note that while the external vent is concealed, the internal vent component remains visible.

## U-values as low as 0.79

OMNIA will deliver exceptional thermal efficiency, enhancing overall comfort and wellbeing of building occupants, while also contributing to sustainability efforts and regulatory compliance.

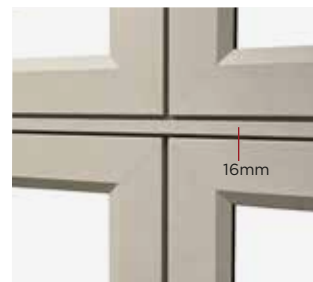

## Beading options

The bevelled bead has been designed for 28mm glazing, complementing the external bevelled sash detail for a consistent and refined appearance. When using the 44mm triple-glazed option, a slimmer bead is required to accommodate the wider insulated glass unit while maintaining the overall design integrity of the window.

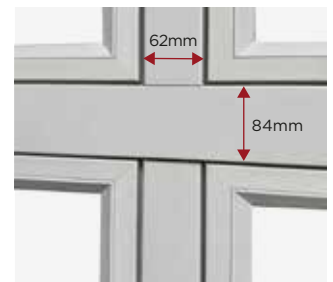

## PCE gaskets included

The PCE is co-extruded to the OMNIA profile during the manufacturing process, streamlining workflows and ensuring consistent quality across all installations.

## Large Visible Transom & Mullion

Outside view

Inside view

Please Note: For Omnia casement window configurations where the mullion or transom exceeds 1565mm in length, a larger mullion is required to provide enhanced structural performance. Please note that this specification will also result in an increase of 22mm to the overall profile size. Please take this into consideration when designing other windows and tilt & turns where the visual difference is reversed inside and outside, as you may wish to match the appearance of some other windows by upgrading their mullions too. Please note that visible mullions are not available on outward-opening French Doors

## Double Rebated

Outstanding performance in sealing the aperture against the elements, providing superior weather resistance and durability.

## Omnia Difference: Reimagining Tradition

While the spirit of the Flush Sash Window is historic, its future is Omnia. Developed with a significant, ground-up investment by Veka, the world's most trusted PVCu brand, Omnia is not a simple rehash of an existing profile. It is a complete, purpose-built suite of Windows and Doors, meticulously engineered for the modern home.

Omnia Tilt & Turn

Omnia stands apart with its innovative double-rebated design, which delivers exceptional thermal and weather performance that far exceeds what was possible in the past. The interior and exterior surfaces are flawlessly flush, with no unsightly gaskets to interrupt the clean lines.

With a meticulous attention to detail, we have created perfectly balanced sightlines that frame your view with a unique sense of proportion.

\*Images are for guidance and inspiration only. Features shown, including colours, glazing, hardware, styles and specifications, may not be available in all product ranges. Please confirm all requirements and final specifications with your installer.

## Omnia Heritage Doors

The Omnia Heritage Doors feature a double-rebated design with a flush appearance both inside and out. Their sleek construction is complemented by no visible gaskets, creating a clean, refined finish.

But perhaps Omnia's greatest achievement is that it refuses to fit neatly into a category. Is it contemporary? Traditional? Heritage-inspired? or Modern?

**The answer is all of the above.**

The range offers far greater flexibility in sizing when compared with traditional Composite Doors. Our Heritage range allows Doors to be manufactured both larger and smaller, making it ideal for heritage properties, non-standard openings, and bespoke architectural designs. This versatility ensures a precise fit without compromise, delivering both design freedom and outstanding performance where standard Composite Doors simply cannot. With PAS 24 security accreditation and U-values as low as 0.9 (Using 44mm Triple Glazing), Omnia Heritage Doors deliver outstanding thermal efficiency-performing just as impressively as they look.

\*Glass is a processed product, and minor imperfections are to be expected, for further information please read The Glass and Glazing Federation (GGF) guidelines for acceptable visual quality of glass.

# The Strength of Tradition OMNIA

The Omnia Heritage Doors feature a double-rebated design with a flush appearance both inside and out. Their sleek construction is complemented by no visible gaskets, creating a clean, refined finish.

**Knife Weld** (white only)

**Graf Weld**  
Foil on White and  
Foil on Foil products.

**Heritage Timber-Look Weld**  
Foil on Foil products only.

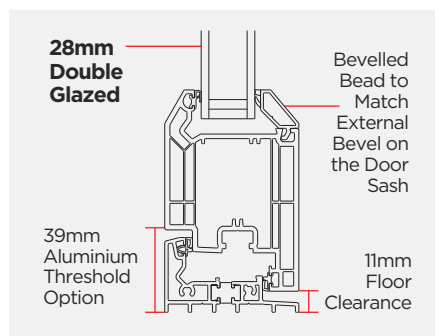

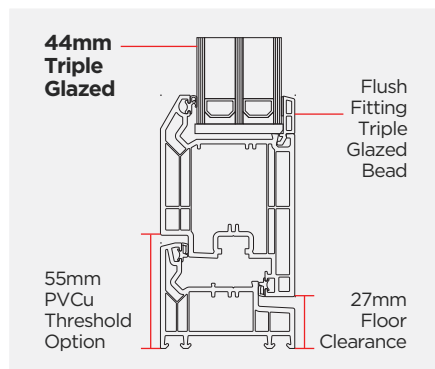

**Optional TimberLook Jointing**

All of our panels are reinforced as standard. For enhanced protection, you can upgrade to SECURICORE reinforcement, providing extra security and meeting PAS 24 standards.

## GT Quad Guard Hinge Protection

3 per Door, fully tested to PAS 24 standards to enhance door security.

## Four Threshold Options

**67mm PVCu threshold**  
39mm floor clearance

**55mm PVCu threshold** – 27mm floor clearance

**39mm Veka rebated aluminium threshold**  
(available in black and silver) – 11mm floor clearance

**Stormguard Document M low aluminium threshold**  
(available in silver) – 20mm floor clearance

Please note: all clearances exclude an external cill, which is 30mm high.

## Four-Hinge Design for Added Strength

Our doors use a four-hinge system, with two hinges positioned at the top, one in the middle, and one at the bottom. This design provides extra support for heavier doors, helping to distribute weight evenly and prevent sagging over time. The result is a stronger, more stable door that opens and closes smoothly and continues to perform smoothly for years to come.

## Fully Adjustable SFS Hinges

SFS fully adjustable hinges, meticulously designed to replicate the look of a traditional butt hinge for architectural authenticity, while offering effortless precision alignment.

**27mm Hinge Clearance**  
from edge  
of hinge to  
edge of door

**\*Yale Platinum ULTRA Cylinder**  
as standard, £5,000 Security guarantee  
Sizes: 45/50 Open In & 50/45 Open Out

**\*Yale Lockmaster locking strip**  
Unlike composite doors, our door comes with **10 point hook and cam locking** for increased compression, security & weatherproof performance  
*\*Only on lever/lever handles (not on Bar Handles)*

**\*Adjustable compression cams**  
4 x Adjustable compression cams that pull the door leaf into the weatherseal  
*\*Only applies to lever/lever handle*

## PAS 24 (Publicly Available Specification 24)

PAS 24:2022 is a UK security standard developed by the British Standards Institution for Door-sets and Windows. It confirms that products can resist forced entry attempts by opportunistic intruders using common tools such as screwdrivers and hammers. PAS 24 certification is frequently required to meet Approved Document Q of the Building Regulations and the Secured by Design (SBD) police initiative for designing out crime.

## Key-wind locks

(for bar handles)

Due to the profile design, only a limited range of stainless steel offset bar handles are available in 1200mm or 1500mm lengths. Please note that these doors feature four locking points and do not include compression rollers. The Yale Ultra Cylinder is positioned as shown on page 4, known as the Town-house position. A pull escutcheon cannot be fitted to this door.

Premium Upgrade

# 44mm Composite Doors

These doors offer all the style and authenticity of a timber door with the features and benefits of today's innovative materials.

Scan the QR Code to reveal our new 44mm Composite Door brochure.

**These rock-solid doors are resistant to wind, rain and UV rays - ensuring your door will maintain that 'just-fitted' look for years to come.**

Composite Doors are resistant to warping, shrinking and expansion whilst being very low maintenance. Whatever the style you choose, you can rest assured that the door has been designed and tested to achieve a high level of security.

These high security composite entrance doors are available in an exciting choice of traditional colours or beautiful handstained finishes. You will find it difficult to distinguish a composite door from a traditional timber door due to its superior grained finish.

- 1 Optional 44mm Aluminium Threshold
- 2 Colour matched Aluminium weather-bar
- 3 GRP compression moulded skins
- 4 **Polyurethane thermally insulated core. The thermal performance of this product is far superior to timber**
- 5 Engineered timber frame
- 6 Market leading adjustable Butt hinge
- 7 Wool-pile weather seal
- 8 Galvanised Steel reinforcing
- 9 Black low line gasket
- 10 Choice of Sculptured or Chamfered outer-frame
- 11 2mm PVC Grained edge-banding
- 12 Foam bung reduces perimeter air circulation from drainage holes

## 70mm Double-Rebated SuperiDoor

The SuperiDoor Composite Door has been designed to combine outstanding security, energy efficiency, durability, and style in one exceptional entrance door solution.

All composite doors may look the same, but they certainly do not perform the same. The SuperiDoor towers above conventional flush-fitting composite doors with its impressive 70mm thickness, double rebated design, 10-point locking system, and 50mm triple glazed decorative glass units featuring laminated glass for enhanced security. If you took a conventional composite door and improved it in every possible way, you would arrive at a SuperiDoor. Better by design and engineered to perform, it delivers exceptional security, strength, thermal efficiency, and long-term reliability that homeowners can truly depend on.

# What does a SuperiDoor offer

SuperiDoor offers exceptional durability, thermal efficiency and market leading enhanced security. Its cutting-edge features ensure it's not just better than the competition but a long lasting solution for modern, secure and energy efficient entrances.

**Steel reinforced** outerframe for increased Strength & Security

**4 x Fully adjustable hinges**  
As Standard on every door available in:

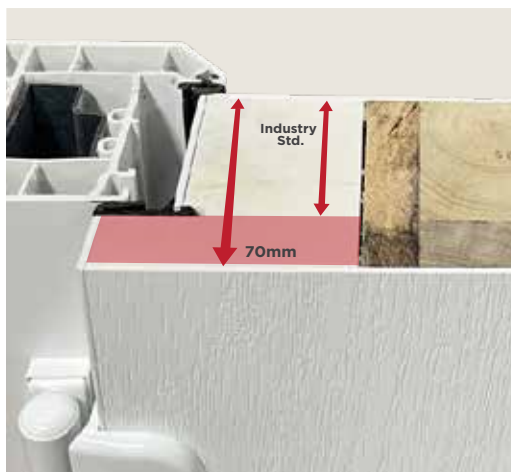

**Additional 25mm weatherseal**

Highly effective in sealing the gap between the door and frame

**70mm Thick Slab**

**59% Thicker** than the industry standard

**Twin rebated as standard**

Twice the amount of perimeter weather seal compared to a standard composite door

**GRP skin**

High impact resistant bonded GRP skin internal & external

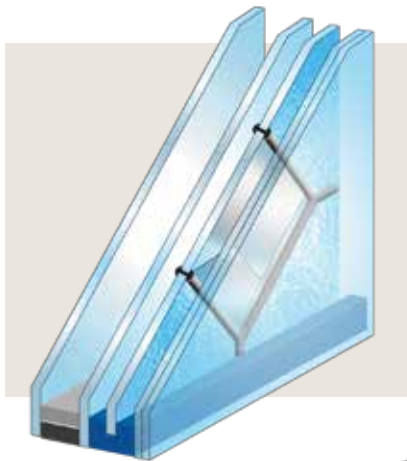

**Engineered wood surround**

For enhanced stability and durability

**Security board**

Internal security board as standard to meet PAS24

**50mm Triple  
Glazed laminated  
units as standard  
108% Thicker  
than the industry  
norm**

**Scan the  
QR Code to  
reveal the  
SuperiDoor  
brochure.**

**Yale**

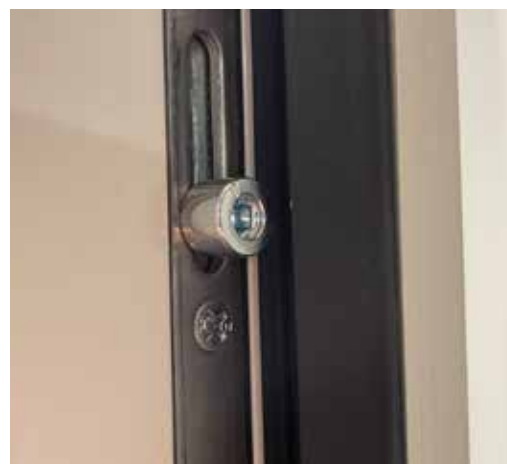

#### **Yale Lockmaster locking strip**

Unlike other composite doors, our door comes with 10 point hook and cam locking for increased compression, security and thermal performance

*\*Only available on lever/lever handle*

**Market leading Ultion 3 Star Plus cylinder**  
as standard, £5000 Security guarantee

#### **Adjustable compression cams**

4 x Adjustable compression cams that pull the door leaf into the weatherseal

*\*Only available on lever/lever handle*

# Sliding Patio Doors

Create a seamless connection between your home and garden while allowing natural light to flood into your living space.

\*Glass is a processed product, and minor imperfections are to be expected, for further information please read The Glass and Glazing Federation (GGF) guidelines for acceptable visual quality of glass.

Designed to glide smoothly and effortlessly, patio doors are incredibly simple to use and ideal for modern everyday living. Because the doors slide inline rather than opening inwards or outwards, they are the perfect solution for balconies, patios, conservatories, or any area where space may be limited.

One of the greatest advantages of a patio door is the uninterrupted view it provides. Larger panes of glass and fewer vertical mullions help create cleaner sight-lines and a brighter, more open feel within the home, making the outside feel part of your living environment.

More versatile than many people realise, a two-pane patio door can also be configured so that either door can operate independently. This provides additional flexibility should your room layout or furniture arrangement ever change in the future.

Combining practicality, security, energy efficiency, and timeless styling, Inline Patio Doors remain one of the most popular choices for homeowners looking to maximise light, space, and lifestyle.

# Feinstruktur® Finish

Premium style. Exceptional durability.  
Guaranteed for 10 years.

Feinstruktur® is a high-performance decorative foil available in elegant Black and Anthracite Grey, designed for modern windows and doors. Combining the refined texture of PVCu with the sleek appearance of powder-coated aluminium, it delivers a sophisticated, architectural look - without the premium price tag.

Perfect for contemporary homes and commercial spaces, Feinstruktur® brings designer style within reach while offering long-lasting performance you can rely on.

# Why Choose Feinstruktur

Style with strength

## Authentic Aluminium Look

A finely textured, matte surface reflects light beautifully, creating the appearance and feel of powder-coated aluminium—ideal for modern and industrial design styles.

## Built to Last

Engineered for everyday life, the robust surface resists knocks, scratches, and fingerprints, keeping your windows looking pristine for years to come.

## Thermally Stable

Advanced infrared-reflecting pigments reduce heat absorption, helping frames maintain their shape and preventing warping or twisting over time.

## Low Maintenance Living

Dirt, marks, and even stubborn residues can be easily cleaned away. The surface resists common household chemicals, including cleaning agents and alcohol.

## Weather & UV Resistant

Designed to withstand harsh weather conditions, temperature extremes, and UV exposure without fading or deterioration.

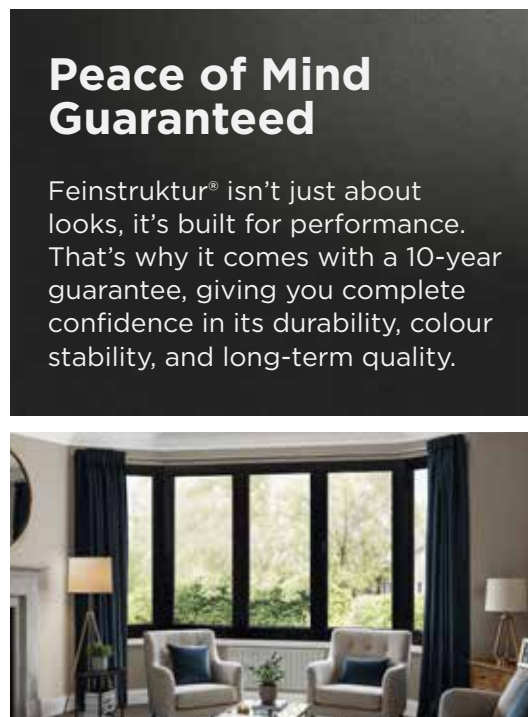

## Sustainable Choice

Manufactured using recyclable materials and energy-efficient processes, Feinstruktur® is an environmentally responsible option for modern living.

## Peace of Mind Guaranteed

Feinstruktur® isn't just about looks, it's built for performance. That's why it comes with a 10-year guarantee, giving you complete confidence in its durability, colour stability, and long-term quality.

Please note: The Feinstruktur finish is exclusively available within our System 10 and Omnia ranges of Windows, Doors, French Doors, and Inline Patio Doors.

## THE ALUMINIUM COLLECTION

Our innovative Aluminium collection combines modern modern styling with strong high performance features. Aluminium offers a stylish and premium solution to home-owners that require optimum comfort with maximum security. The Aluminium profiles are thermally broken as standard with a unique design to improve thermal performance.

### **The Collection Includes:**

- Casement Windows
- Flush Casement Windows
- Tilt & Turn Windows
- Residential Doors
- French Doors
- Bi-folding Doors
- Inline Patios
- Lift & Slide Patios
- Lantern Roofs
- Flat Glass Roofs

\*Glass is a processed product, and minor imperfections are to be expected, for further information please read The Glass and Glazing Federation (GGF) guidelines for acceptable visual quality of glass.

## Features include...

- Integrated night vent position
- Optional Child safety restrictors
- Optional trickle ventilation
- Enhanced security and tested to PAS 24
- Tested to hurricane force winds
- Double or triple glazed options
- Projecting top or side hung vents
- Multipoint locking

# Casement, Flush Sash and Tilt & Turn Windows

Keeping the elements out but letting the light in.

The casement window is the classic and most popular solution for residential homes in the UK. Elegant and versatile in design, aluminium is inherently strong, helping your home stay safe.

Tilt & Turn Windows are designed & engineered to be sophisticated, practical and multifunctional, the aluminium tilt & turn window carries a host of features. Unlike the casement window the tilt & turn window opens into the property and can be made with larger opening vents which is useful when fire escape is required. The tilt position offers ample ventilation, whilst in the turn position, the glass can also be safely and easily cleaned which is especially important in higher or harder to reach locations. The tilt & turn is also commonly used by architects to maximise light intake whilst achieving a minimal contemporary look.

# Doors & French Doors

Designed with the highest levels of security and performance

### French Doors

Why not choose a matching set of aluminium French Doors which are sure to compliment any surroundings. Our French Doors are designed to give easy access to the garden which is especially important during those warm summer months.

### Residential Doors

Our entrance doors are built to the highest levels of security and performance in a range of designs to suit the style conscious and practically minded. A typical entrance door needs to be strong and secure, in a style that represents the architecture and be inviting to all guests who pass through. Unlike windows, a door is more likely to be used several times per day and be able to withstand the rigours of the British climate. Available in a wide range of designs, colours and glazing, there is certain to be a Definitive Collection aluminium door for you.

# Inline & Triple Track Patio Doors

Designed to maximise light and views, our innovative Patio Door range has become a popular alternative to Bi-folding Doors.

Scan the QR  
Code to reveal  
our Aluminium  
Patio Door  
brochure.

\*Please note the maximum width is only a guideline and is restricted by the height. Before you embark on any building work please ask your installer for advice and guidance.

### Inline Patio Doors

Our bespoke Patio Door range offers simplicity in design and operation whilst the wider doors and slimmer profiles ensure plenty of light filled space. Unlike hinged doors, the traditional sliding Patio Door glides effortlessly, allowing you to maximise space without compromising on design. The Patio doors can add value to divide a space when closed and unite two spaces when open. The inline sliding door creates a seamless connection between your indoor and outdoor living spaces. Combining unique system design with a range of configurations they will enhance your home whilst keeping the weather at bay.

### Inline Triple Track Patio

The Triple Track Patio is a popular alternative to Bi-folding Doors and the use of less vertical mullions across a wider span offers uninterrupted views of your garden and beyond. Wider panels (\*up to 2000mm in width) are available to incorporate more glass and offer increased light transmission to darker spaces. Panels one and two slide neatly behind panel three, and to maximise versatility they can also be opened from either end (this is optional). Please note the maximum width of each panel is only a guideline and is restricted in the height. Before you embark on any building work please ask your installer for advice & guidance.

## Lift & Slide Patio Doors

Performance & Design go hand in hand. Sliding Doors are a simple but affective way to provide a lot of space and light.

The Lift & Slide Patio is the pinnacle of Patio Door design allowing greater widths & heights per pane whilst gliding effortlessly due to the sliding pane being lifted from the track for less friction. This premium Patio design can also be locked in a night vent position allowing fresh air into your home without compromising on security.

**Available in the following standard colour options:**

- Anthracite Grey both sides
- Black Both sides
- Anthracite on White
- White Both sides

The Lift & Slide is the ultimate in Patio Door engineering and preferred by architects for large span openings. When closed, the door lowers securely onto its seals, delivering exceptional thermal efficiency, weather resistance, and security. Whether you're creating a contemporary extension or enhancing a modern home, they provide a luxurious solution for seamless indoor-outdoor living.

Also available in a large range of bespoke RAL Colours

# Bi-folding Doors

The bi-folding door meets the demands of contemporary living and combines this with beauty and practical functionality.

\*Glass is a processed product, and minor imperfections are to be expected, for further information please read The Glass and Glazing Federation (GGF) guidelines for acceptable visual quality of glass.

A popular architectural choice for modern homes and versatile living, our aesthetically pleasing Aluminium Bi-folding Doors can span the full length of a room and when opened offer uninterrupted views of the great outdoors. Using the latest technology to keep you warm and safe, our range of bespoke made to measure Aluminium Bi-folding Doors are strong, durable and easy to operate, gliding smoothly along their purposely engineered track.

Available in a wide range of powder coated RAL colours, the modern Bi-folding Door is appealing not only in its design but as a practical solution for increasing space and light.

To ensure your complete satisfaction, the Doors can be configured in different ways to suit their intended purpose. Please note that not all style configurations have a main traffic Door and therefore please bear this in mind when agreeing the final design.

# Roof Lanterns & Flat Roof Lights

Multi-Award-Winning Aluminium Glazing Solutions from KORNICHE  
Sleek, modern designs are available in a range of flexible configurations and customisable colours to perfectly suit your space.

## KORNICHE Roof Lantern

- 10 year warranty
- PAS24 security as standard
- Ultra slim sightlines (35mm)
- Improved thermal efficiency
- Contemporary square edged top caps
- Fully integrated LED option

# KORNICHE Flat Glass

- 10 year warranty
- PAS24 security as standard
- Bespoke sizes up to 3m2
- Double and triple glazed options
- Sleek modern design
- Optional SIPS upstands available (improving overall thermal efficiency)
- Available in 3 stock RAL colours:  
RAL 9910 - Gloss White  
RAL 7016 - Matt Grey  
RAL 9005 - Matt Black
- Glass colour options:  
Clear, Neutral, Blue, Premium Blue

## Conservatories & Orangeries

Conservatories and Orangeries still remain a very popular choice for extending your home with plenty of light to create a versatile and comfortable living space. These totally bespoke extensions can be personalised to suit the individual needs of any lifestyle. With a broad range of colours and building materials to choose from they are sympathetic to any setting.

Please Note: The Definitive Collection supplies the windows, doors, and associated frames only. Conservatory roof systems are not supplied by The Definitive Collection.

### Conservatories

As well as offering the finest range of windows and doors, The Definitive Collection frames are also used to create a superb range of either classically or contemporary designed conservatories that are individually tailored to meet your needs and desires. Conservatories make wonderful family rooms such as studies, sitting rooms & playrooms.

### Orangeries

An orangery, whether a traditional timeless classic or a more modern style, is a more substantial integrated permanent structure. Unlike a conservatory, which is mainly a glass structure, an orangery utilises a fusion of different building materials such as brick pillars and solid roof technology.

# Case Study

Roger Leighton Homes Limited is a developer of exclusive and luxurious family homes that are purposefully designed to be sympathetically situated within their natural surroundings, with each property being individually modelled to reflect this ethos.

All of the installed products used within the development are from The Definitive Collection portfolio and were selected because of their looks, energy, security and safety performance credentials.

## A Lincolnshire Village Development

### Definitive Collection Products Used

- Variations of Coloured Foils
- Casement Windows
- Run through Sash Horns
- Flush Sash Windows
- Authentic Georgian Bar
- Composite Doors
- Bi-Folding Doors
- French Doors
- Conservatory Roofs
- Skypod Lantern Roofs

### Pushing the boundaries with expression through colour...

To further promote the character and individuality of each home, the developer opted to use multiple colours for the windows instead of just one colour. The colour spectrum included a unique mix of Anthracite Grey, Agate Grey, Black, and Cream, further complimented by Black and Oak effect doors, which maximised impact.

### Uncompromising approach to quality, practicality and design...

The uncompromising approach taken to designing these country style properties also factored in practicalities such as energy performance, security and safety. 'A' rated Windows with cottage style authentic bars were installed to every property with each side hung window having means of fire escape and easi-clean hinges fitted as standard. All Windows were fitted with multi point reverse action locks and the Doors were fitted with the latest high security Door cylinders and Yale multi-point hook-bolt locks.

# A Forever Home: The Peasholm Project

For a young couple in Scarborough, creating their forever home meant more than just a renovation— it was a journey to build a space that was both beautiful and highly functional. Their vision was to breathe new life into their property, transforming it into a family home with a stunning kitchen and a multifunctional living area. They knew that their windows and doors would be crucial to this plan, having had previous experience with products that looked good but lacked substance.

## Meticulous Planning & Expert Partnership

The homeowners approached their Definitive Collection installer with a clear goal: to find products that delivered on every level. The installer worked closely with them, meeting several times to understand their extensive list of requirements. They wanted to retain the traditional charm and character of their 1930's home, including encapsulating the original leaded and stained top-lights, while gaining all the benefits of modern, high-performance PVCU and glazing.

## Omnia Flush Sash Windows Ticked Every Box.

After careful consideration, the couple chose our Omnia 'double rebated' Flush Sash Windows as the smart design ticked every box. The stunning cream woodgrain foil on the exterior and a white woodgrain foil on the interior perfectly replicated the look of traditional timber, giving them the aesthetic they desired without compromising on performance. They were also enthralled by the double flush design, which they could appreciate from both the inside and outside of their home.

In an increasingly busy world, the importance of valuing our surroundings - especially our home environment - has never been greater. Our homes should be more than just a place to live; they should be a sanctuary where we can unwind, recharge, and enjoy the simple comforts of life.

## Performance Without Compromise

Windows and doors are a lifestyle choice, offering not just a designer look but also comfort, performance, and long-term value. This family's project is a perfect example of what can be achieved with a little extra thought.

**Energy Efficiency:** The double-rebated design of the Omnia Flush Sash Windows, combined with their high-performance glazing, was a top priority given the rising cost of heating.

**Acoustic Performance:** They selected 8.8mm acoustic glazing, which not only provides excellent soundproofing but also enhances security and energy efficiency. You can see the incredible effect of this in a video of the window closing, which completely shuts out the noise of an excavator on-site.

### **Security:**

Peace of mind was non-negotiable.

All doors were fitted with 3-star high-security locking cylinders as standard, and the windows included 'Maco' shootbolt locking and high-security hinge-bolts engineered for maximum protection

**Safety:** For their young family, safety was paramount. The upstairs windows were fitted with safety restrictors on all open sashes. (featured on page 24)

## The Final Result: A Shining Example

The end result is truly transformative. This family's home is a shining example of what happens when you prioritize quality and performance. They have created a cherished space where they can relax in comfort, secure in the knowledge that their hard work and attention to detail has paid off. The satisfaction of getting every detail right has given them happiness and peace of mind for years to come.

# Taking care of your new windows and doors

Love where you Live!

Although your new windows and doors are very low maintenance they will still need periodic cleaning. For cleaning and maintenance please consult your installer who will be happy to provide the correct cleaning instructions relating to each specific product & material. (Please remember never to use any solvent based or abrasive cleaners)

**The Definitive Collection** - products are made under a Quality Assured framework. This ensures that all products are manufactured using consistently applied methods, which are very important to achieve the highest quality standards.

**BS EN1279** - All The Definitive Collection Double and Triple Glazed Units are manufactured to the highest standard with regular testing for the sealant, air/gas leakage, moisture penetration, and climate exposure.

**BS7412 General Performance for Casement Windows** - This standard specifies requirements for the design, fabrication and performance of our PVCu Collection.

**PAS 24 Enhanced Security for PVCu Casement Windows** - A series of testing for unauthorised forced entry for Casement Windows using approved components and hardware. These must be fitted with hinge bolts as featured on page 24.

**BS6375** - provides guidance to the manufacturer of windows on an appropriate level of weather performance for the UK.

**Secured by Design (SBD)** Casement Windows only - Established in 1989, Secured By Design is owned by the Police Crime Prevention Initiatives Limited and is the corporate title for a group of national police projects focusing on the design

and security for homes, commercial premises and car parks as well as the acknowledgement of quality security products and crime prevention projects. The company operates a licensing scheme and includes member companies who are entitled to use the Secured By Design logo and promote the term 'Police Preferred Specification'.

## ER Certification's part 'L' Compliance scheme (PLC)

**ERC Certified for Energy Efficiency** - Our PVCu Windows are independently tested and rated to give you confidence in their thermal performance

**ER CERTIFICATION LTD**
